Exclusive exterior for JB74

ABS Front Bumper Spoiler

For JB74

- Unpainted E00600 With hole E00620 Without holes
¥48,000 each
- Black (grained)* E00601 With hole E00621 Without holes
¥63,000 each
- *Semi-glossy black like the genuine bumper. Genuine color (JPN), slightly darker and blacker than Genuine bumper.
- Genuine color (JPN) ★1
E00602 With hole E00622 Without holes
¥63,000 each

ABS front bumper spoiler designed to match the square exterior of JB74. The sporty look with a low profile and a good approach angle. Fits to the factory fog lamps (cutting of interfering parts is required). Our LED fog lamps (sold separately) are also compatible. Two types of headlight washers with holes (JC grade) and without holes (JL grade) are available. Includes mesh net (black) to be attached to the front license plate bracket and duct. Installation of our optional skid plate is required.

Black (grained)

Skid Plate

For JB74

The skid plate greatly affects the impression of the front area. It protects the engine and parts under the floor from road protrusions and stones. Required when installing our front bumper spoiler. No drilling is required and it can be installed completely by bolt-on. The main body is made of aluminum with a thickness of 3 mm, and the mounting bracket is made of steel with a thickness of 3.2 mm, providing sufficient strength. Available in two colors: black anodized aluminum and silver (plain).

E00038 Black ¥15,500

E00039 Silver (bare) ¥13,000

★1: Available genuine colors are Blueish Black Pearl 3 (ZJ3), Jungle Green (ZZC), Pure White Pearl (ZVR), White (26U), Kinetic Yellow (ZZB), Chiffon Ivory Metallic (ZVG), Brisk Blue Metallic (ZWY), Medium Gray (ZVL), and Silky Silver Metallic (Z2S).

Precautions

ABS products do not generally require modification during installation due to the small individual differences that occur during production, but in rare cases, modification may be necessary. Please be sure to paint the product before use.

QR code is a link to the product video.

ABS Rear Bumper Spoiler Type1

For JB74 E00650 Unpainted ¥46,000

E00651 Black (grained)* ¥61,000

*Semi-glossy black like the genuine bumper. Genuine color (JPN), slightly darker and blacker than Genuine bumper.

E00652 Genuine color (JPN) ★1 ¥61,000

ABS rear bumper spoiler designed to match the square exterior of JB74. The shape of the bumper spoiler covers the back part of the tail lamps to protect them from rainwater and mud that may splash from the tires. The tail lamps for JB64/74 can be installed with the genuine and external tail lamps. Note that some cutting or other adjustments may be required to install the lamps.

Dustproof and drip-proof design

*Not compatible with Type 4 rear parking sensors.

ABS Rear Bumper Spoiler Type2

For JB74 E00660 Unpainted ¥50,000

E00661 Black (grained)* ¥67,000

*Semi-glossy black like the genuine bumper. Genuine color (JPN), slightly darker and blacker than Genuine bumper.

E00662 Genuine color (JPN) ★1 ¥67,000

ABS Rear Bumper Spoiler Based on the sharp style of Type 1, a new number pocket is added. Although the spare tire must be moved on this model, the license plate can still be installed as before, allowing for cost-saving customization. Dustproof and drip-proof design with full coverage of the area behind the tail lamps. Pre-drilled hole for stock rear view camera. Fits to stock tail lamps and external tail lamps for JB64/74. Cutting and other adjustments may be required for installation. *Not compatible with Type 4 rear parking sensors.

Dustproof and drip-proof design

Rear Bumper Guard

For JB74

E00153 ¥30,000

Rear bumper guard designed in accordance with the standards of the anti-entry device regulations. This product is designed for vehicles with Showa Garage bumper spoiler and Lynx muffler. The steel body is coated with crystalline paint (wrinkle paint and condensation paint) for high strength and tough texture to protect the bar body. Installation is bolt-on only, and the mounting position and angle can be adjusted. Ideal for customizing the rear area of lifted vehicles.

[About Vehicle Inspection]

Pass/fail decisions may vary depending on the condition of the vehicle, installation method, and the inspector's opinion. For details, please check with the Transportation Branch Office with jurisdiction.

AES Side Garnish

For JB74

E00207 ¥43,000

The side sill cover exclusively for JB74 is made of AES material with high weather resistance. Along with dressing up the vehicle, it protects the body from flying rocks and scratches when getting in and out of the vehicle. The design matches the wide fenders of the Jimny Sierra to enhance the sense of unity.

* Side steps can be installed when this product is installed.

Side Step

For JB74

Strong side steps made of steel. The simple design with only pipes makes it compatible with A-x Roof Rack and Rear Ladder (sold separately). The baked-in grained paint finish gives it a good quality feel. Can be bolted directly to the rudder frame. Long/short type selectable. Vehicle inspection compliant. *AES side garnish is required for installation.

JB64

EXTERIOR Exclusive exterior for JB64

Front Bumper Spoiler For JB64

A sporty looking front bumper spoiler with a reduced top and bottom size. It matches the square exterior of JB64. Can be attached to the factory fog lamps (cutting of interfering parts is required). ABS type has a hole for headlight washer (XC grade) and FRP type has a hole for headlight washer (XL and XG grade). Includes mesh net (black) to be attached to the front number bracket and duct. Both require installation of our optional skid plate.

- 《Made of ABS》
- Unpainted E00300 With hole E00320 Without holes ¥45,000 each
 - Black (grained)* E00301 With hole E00321 Without holes ¥60,000 each
- *Semi-glossy black like the genuine bumper. Genuine color(JPN), slightly darker and blacker than Genuine bumper.
- Unpainted (gel coat finish) ★1 ¥60,000
- 《Made of FRP》 E00040 Unpainted (gel coat finish) ¥37,000

Skid Plate For JB64

The skid plate protects the engine and parts under the floor from road protrusions and stones. It is a part that gives the front area an impressive style. Required when our ABS front bumper spoiler is installed. No drilling is required and it can be installed completely by bolt-on. The main body is made of aluminum with a thickness of 3mm, and the mounting bracket is made of steel with a thickness of 3.2mm, providing sufficient strength. Available in two colors: black anodized aluminum and silver (plain).

E00036 Black ¥17,500

E00037 Silver (base material) ¥15,000

Side Step For JB64

Strong side step for JB64 made of steel. The simple design with only pipes makes it compatible with A-x Roof Rack and Rear Ladder (sold separately). Baked-in grained paint gives it a good quality feel. Can be bolted directly to the rudder frame. Long/short type selectable. Vehicle inspection compliant.

Type 1

- E00170 Right and left side set ¥57,000
- E00171 Left side ¥29,000
- E00172 Right side ¥29,000

Type 2

- E00173 Right and left side set ¥105,000
- E00174 Left side ¥53,000
- E00175 Right side ¥53,000

AES Side Garnish For JB64 E00206 ¥35,000

Side sill covers for JB64 finished with weather-resistant AES material. It protects the body from scratches caused by flying rocks or when getting in and out of the car at the same time as dressing up the car. By blacking out the lower part of the body, the height of the vehicle is visually raised. 9mm wide fenders can be used together with this garnish to create a more elegant look.

★1: Available genuine colors are Blueish Black Pearl 3 (ZJ3), Jungle Green (ZZC), Pure White Pearl (ZVR*only XC), White (26U *only XL/XG), Kinetic Yellow (ZZB), Chiffon Ivory Metallic (ZVG), Brisk Blue Metallic (ZVY), Medium Gray (ZVL), Silky Silver Metallic (Z2S).

Precautions

ABS products do not require any modification during installation due to the small individual differences that occur during production, but in rare cases, modification may be necessary. FRP products have many individual differences during production and require adjustment such as modification, processing, etc. and painting before installation.

Rear Bumper Spoiler Type 1 For JB64 *Up to Type3

This rear bumper spoiler is smartly designed to match the square exterior of JB64. The rear bumper spoiler covers the back part of the tail lamp to protect the lamp from rainwater and mud from the tires. Note that some cutting or other adjustments may be required to install the lamps. The license plate number and spare tire need to be moved.

*Not compatible with Type 4 rear parking sensors.

《Made of ABS》 E00400 Unpainted ¥44,000

E00401 Black (grained)* ¥59,000

*Semi-glossy black like the genuine bumper. Genuine color (JPN), slightly darker and blacker than Genuine bumper.

Genuine color★1 ¥59,000

《Made of FRP》 E00045 Unpainted (gel coat finish) ¥36,000

Dust-proof and drip-proof design

Rear Bumper Spoiler Type2 For JB64 *Up to Type3

Based on the square silhouette rear bumper spoiler with impressive duct design, a license plate pocket is added. Only the spare tire needs to be moved and cost-saving customization is possible. Reliable dust-proof and drip-proof design protects tail lamps from rainwater and mud. Drilled holes for the factory rearview camera have been machined, allowing installation of JB64/74 factory and external tail lamps. Cutting and other adjustments may be required for installation.

*Not compatible with Type 4 rear parking sensors.

《Made of ABS》

E00430 Unpainted ¥51,000

E00431 Black (grained)* ¥66,000

*Semi-glossy black like the genuine bumper. Genuine color(JPN), slightly darker and blacker than Genuine bumper.

Genuine color★1 ¥66,000

Rear Bumper Spoiler ALTO tail spec For JB64 *Up to Type3

Developed based on the tail lamp for ALTO (compatible model: for HA36 made by Embro or 415COBRA). Stylish finish. The back of the tail lamp is covered to protect the lamp from rainwater and mud that may splash from the tires. The FRP model has an unpainted gel coat finish.

*Not compatible with Type 4 rear parking sensors.

《Made of ABS》 E00420 Unpainted ¥44,000

E00421 Black (grained)* ¥59,000

*Semi-glossy black like the genuine bumper. Genuine color (JPN), slightly darker and blacker than Genuine bumper.

Genuine color★1 ¥59,000

MBRO LED Tail Lamps for HA36 ¥30,000 each

Tail lamps for Showa Garage's Rear bumper spoiler (ALTO tail spec.).

E00066 Clear/Red Tube

E00067 Clear/White Tube

Rear Bumper Guard For JB74 E00152 ¥28,000

Rear bumper guard designed in accordance with the standards of the anti-entry device regulations. This product is designed for vehicles with Showa Garage bumper spoiler and Lynx muffler. The steel body is coated with crystalline paint (wrinkle paint and condensation paint) for high strength and tough texture to protect the bar body. Installation is bolt-on only, and the mounting position and angle can be adjusted. Ideal for customizing the rear area of lifted vehicles.

[About Vehicle Inspection] Pass/fail decisions may vary depending on the condition of the vehicle, installation method, and the inspector's opinion. For details, please check with the Transportation Branch Office with jurisdiction.

9mm Wide Fender For JB64 E00201 Made by AES ¥50,000

E00221 Made by ABS, unpainted ¥32,000

E00226 ABS, Genuine color (JPN) ★1 ¥63,000

E00227 Made by ABS, Black (grained) ¥63,000

Unpainted

Genuine color (JPN)

About AES resin

AES resin is a weather- and impact-resistant resin in which the butadiene rubber of ABS resin is replaced by light- and heat-resistant ethylene propylene rubber. It is also environmentally friendly because it reduces painting costs as a byproduct, and is currently used in a wide range of fields including construction materials and automotive exterior parts. Incidentally, some ABS resins deteriorate to white in less than a year when used outdoors without coating, but AES resins can be used outdoors for a relatively long period of time.

*Durability depends on the environment in which the product is used.

JB64/74

EXTERIOR Common exterior for JB64/74

Carbon Bonnet

*Clear painted

For JB64/74 E00700 ¥120,000

FRP Bonnet

*Unpainted gel coat finish

For JB64/74 E00701 ¥72,000

This is a carbon hood made by L-RTM method. The carbon model weighs approximately 6.7kg, 4.8kg less than the factory model. The back side of the hood has a ribbed structure similar to that of the factory hood, with sufficient strength taken into consideration. Each catch and installation part is also highly precise. The product is beautifully clear coated to ensure durability. The L-RTM construction method allows for a smooth finish, and combined with the clear coating, the appearance is almost mirror-like. Even the corners of the product have an even weave. The carbon fiber grain uses a twill weave, which is considered to have a beautiful appearance. Generally speaking, the farther the weight is from the center of gravity of a car, the greater the effect on mobility. The hood is also highly effective in reducing weight due to its position, and has a great impact on handling and other aspects of the vehicle. For Jimny, which is not even lightweight, weight reduction is a major tune-up for its dynamic performance.

What is L-RTM method?

The L-RTM process is a molding method that uses male and female molds. After the fiber is set in the mold, a vacuum is created inside the mold. The resin is then injected into the mold and cured to form the product. The thickness of the product is even and the strength is less likely to be uneven, making it lighter than conventional products.

FRP Rear Wing

For JB64/74

E00710 ¥35,000

This FRP rear spoiler gives the JB64/74 a sportier look. Although small in size, it adds a little accent to the tail. The exquisite size and design make it look like a genuine option without any sense of discomfort. The gate opening/closing and visibility of the high mount lamps are not affected at all, and it is just as easy to use as stock. No drilling or other modification to the body side is required for installation, and the included double-sided tape and metal clamps (4 pieces in total on both sides) can be used to firmly fix the product in place. *Unpainted gel coat finish. *Cannot be used in combination with our rear ladder.

ABS Front Grille

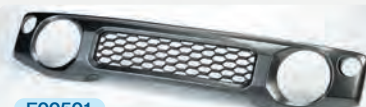

For JB64/74

ABS front grille with simple design and no manufacturer's logo. The grille is an important part that determines the exterior impression, and since ABS resin does not have good weather resistance, we recommend painting the grille before use. The original color Black (grained) is a genuine semi-glossy black paint with grains. The color is slightly darker than Genuine color (JPN).

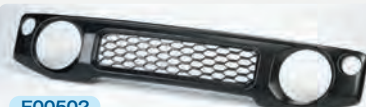

E00500 Unpainted ¥13,300

E00503 Genuine color (JPN) ★1 ¥32,000

E00501 Dark Gray Metallic ¥29,000

E00502 Black (grained) ¥29,000

E00504 Blueish Black Pearl 3 (ZJ3) ¥29,000

ABS Sports Grille

For JB64/74

A four-bar design front grille made of impact-resistant ABS material. The spindle-shaped opening line is a perfect match with the front bumper spoiler. Choose from unpainted or colored settings that do not require painting. The original color, Black (grained), is a genuine semi-glossy black paint with grains, which gives a slightly darker finish than the factory bumper.

Standard Style / Unpainted

E00522 Black (grained) ¥54,200
E00523 Genuine color (JPN) ★1 ¥54,200
E00524 Blueish Black Pearl 3 (ZJ3) ¥54,200

LED License Plate Transfer Kit

For JB64/74

This is an essential part when there is no space to mount a license plate on the rear bumper. The normal spare tire position interferes with the plate, so the use of a spare tire transfer bracket (sold separately) or removal of the spare tire is required. Made in Japan.

With drilling

E00123 ¥10,800

The mounting bracket is made of stainless steel and the license plate light is made of resin to prevent rusting. Drilling is required for installation. JB33, 43, and 74 should have their license plates resealed. Includes Showa Garage logo sticker that can be attached to the license plate light.

Exclusive for JB64/No drilling required

E00131 ¥15,000

No drilling is required. The license plate light is made of resin so it will not rust, and LEDs are used for long life. Includes Showa Garage logo sticker that can be attached to the license plate light. Cannot be used at the same time as the spare tire moving bracket. JB74 non-compliant products.

License Plate Moving Bracket

For JB64/74

E00020 ¥2,300

Bracket used when moving the license plate number. The set includes only the mounting bracket (stainless steel). No license plate light or bolts are included. The pitch of the holes for the license plate light is 200mm.

LED License Lamp

For JB64/74

E00110 ¥6,800

LED license plate light with resin used for the lamp body and lens. Screw pitch 200mm, wiring length approx. 190cm, with Showa Garage logo sticker. Made in Japan.

Spare Tire Moving Bracket

Bracket to move the spare tire to the upper right or upper left. Required when installing Showa GARAGE rear bumper spoiler. Prevents interference with straight bumpers, and also supports changes to larger diameter tires (225/75R16, etc.). The model with the upper right movement also secures a space for relocating the license plate number.

Vehicle Inspection (in Japan)

Many conventional brackets for mounting a spare tire facing outward exceed the dimensions of mini vehicles and are not in compliance with safety standards. The bracket for JB64 is divided into a base part and a tire-mounting part, and the base part and the tire-mounting part are joined by a "simple installation method" that allows easy removal without tools, thereby clearing various problems. The product fits within the standards for mini vehicles and can pass vehicle inspections without the need for formalities.

JB64 Vehicle Inspection Compliant, facing outward

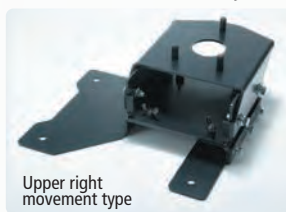

For JB64

E00021 Upper right movement type ¥29,800

E00022

Directly upward movement type ¥26,800

The unique structure meets safety standards. Car inspection compliant. There are two types: a model that moves 82mm to the right and 106mm upward, and a model that moves 106mm straight up. The model with the right upward movement also secures space for mounting a license plate number. Please prepare 3 nuts for wheel mounting. Includes rubber to prevent tire shake.

Upper right movement type

Directly upward movement type

JB74 Vehicle Inspection Compliant, facing outward

For JB74

E00019 Upper right movement type ¥26,500

E00047

Directly upward movement type ¥23,000

There are two types of models: one that moves 82mm to the right and 106mm upward, and the other that moves 106mm straight up. The model with the right upward movement also secures a space for mounting a license plate number. Includes rubber to prevent tire shake. Please prepare 3 nuts for wheel mounting.

Upper right movement type

Directly upward movement type

JB64/74 Genuine Move

For JB64/74

E00018 ¥9,000

Moves 50mm to the right and 100mm to the top. Assumes standard to 195 size tires (up to 6.50R16 or 225/75R16). The width from the original to the rear is about 25mm. If our front bumper spoiler and rear bumper spoiler are used, they fall within a certain range, so the continuing inspection is compliant. If other manufacturers' bumpers are used, the front bumper will be within the same width as the normal bumper, and the rear bumper will be within the specified range provided that the rear edge of the bumper does not extend beyond the last edge of the spare tire bracket, and the vehicle will be compliant for the continuance inspection.

Mesh Net General purpose

Aluminum honeycomb mesh net (mesh size: 18 mm x 9 mm) and ABS resin honeycomb mesh net (mesh size: 30 mm x 13 mm) can be freely used to create a luxurious Euro style or a sporty style. The ABS mesh net is flexible and can be shaped by using a heat gun, etc. The aluminum mesh net is painted gloss black. Aluminum mesh is painted gloss black.

E23000 Aluminum mesh net ¥1,700 (100cm×35cm)

E23001 ABS honeycomb mesh net ¥2,000 (120cm×40cm)

JB64/74

EXTERIOR Common exterior for JB64/74

Rear Ladder Aluminum 30mm Back

For JB64/74

E00148

Narrow type ¥34,000

E00157

Wide type ¥36,000

Rear ladder to be attached to the rear gate hinge. Rust-resistant and highly durable aluminum material is used. Convenient when using a roof rack or other equipment. By attaching it to the hinge, the distance between the fulcrum and the point of force is shortened to reduce the load on the rear gate. The slim shape prevents interference even when large-diameter tires (225/75R16, etc.) are mounted diagonally right above the factory position. Compared to the previous model, the mounting portion has been extended by 30mm to allow a greater distance from the gate and make it easier to place a foot on the gate. A wider type with a width of approximately 55mm for even greater ease of use is also newly added to the lineup. The color is a heavy finish with the well-known Wrinkle coating (baked crystalline coating) of A-x roof racks. Made in Japan. By using the optional spacer, the clearance to the gate can be increased by 10mm, making it even easier to use. Please use the non-slip tape to prevent the gate from stepping off. *Cannot be used with FRP rear wing.

Narrow type

10mm Spacer for Rear Ladder

For JB64/74

E00145

For aluminum ¥2,800 each

By using this spacer, the clearance between the ladder and the rear gate is increased by 10mm. The toe can be placed further back, making it easier to put your foot on.

Anti-theft Bolt for UNIFAS iGuard Rear Ladder

For JB64/74

E00143

For steel and stainless steel

E00156

For aluminum

¥2,400 each

Innovative screw kit with high level of security, completed by a group of skilled screw craftsmen. Ideal for preventing theft of the rear ladder. The use of stainless steel makes it rust-resistant and aesthetically pleasing to the eye. The kit includes a special tool and two types of bolts (one long and one short). The long bolt is for the optional 10mm rear ladder spacer, and the short bolt is for when the 10mm spacer is not used.

Non-slip Tape for Rear Ladder

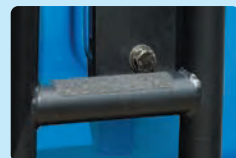

For JB64/74

E00141 For Narrow type

¥600 5 pieces

E00158 For Wide type

¥800 5 pieces

Non-slip tape provides a secure grip. The standard tape is approximately 10 cm long, and the wide tape is approximately 13 cm long in strips. The back side is a sticker, so it is easy to apply and install.

Bonnet Damper

E00154

Black ¥4,200 right and left set

E00155

Gunmetal ¥4,800 right and left set

For JB64/74

Easily opens by hydraulic pressure. It does not get in the way like a hood stay and makes maintenance easier. Installation is completely bolt-on, requiring no drilling at all. Not for use on FRP or carbon fiber hoods.

Black

Gunmetal

Door Mirror Visor Cover

For JB64 XC/74 JC

E00250

¥20,000 right and left set

Out mirror visor covers with a distinctive pattern that changes expression depending on the angle of view. No modification is required, just replacement, to add individuality to the door surroundings.

ABS Fuel Lid Cover

For JB64/74

E00210

Unpainted ¥2,500

E00211

Black (grained) ¥5,800

Black (grained)

Three ribs on the surface create a tough image. The quality of the product is excellent, and it can be installed on any body color. Easy to install with only double-sided tape. Fits perfectly to the factory fuel lid. Usability, such as opening and closing, will not change at all.

*ABS resin has poor weatherability, so we do not recommend using the product unpainted, as it will deteriorate prematurely.

Muffler Cutter

For JB64/74

E00052

¥9,000

Designed exclusively for JB64/74, this muffler cutter gives a sporty look to the rear end. Manufactured by 5ZIGEN, a long-established muffler manufacturer. With dropout prevention mechanism. Made of stainless steel. Showa GARAGE logo. (JB74 Type 4 is not compatible.)

Spare Tire Cover

For JB64/74/23/43

Illustrated pattern

¥4,300 each

Spare tire cover to decorate the back of your Jimmy. A wide variety is available. Can be installed on 175/80R16 (JB64, JB23 standard tire), 195/80R15 (JB74 standard tire), 205/70R15 (JB43 standard tire), and 185/85R16. Not for installation on 185/85R16.

Compatible with JA11 to JB23!

Half-size is flexible and can be used in any way you like. It can also be used with various attachments such as a roof box and a cycle/winter carrier.

Weight: 6.9kg Dimensions (outside): Length 150cm, Width 62cm, Height 13cm
Dimensions (inside): 120cm x 55cm

Cargo Net General purpose

Ideal for securing outdoor gear such as containers and tents. The hooks are movable, allowing for a high degree of freedom in adjusting the degree of cargo hanging. Made of resin that is resistant to breakage, strong, and has relatively low aggressiveness to objects. Moderate elasticity of approximately 150% provides both ease of use and fixing force.

Compatible roof rack sizes are for reference only.

The size of the corresponding net varies greatly depending on the actual roof rack used and the shape and amount of cargo. Please select the size after considering the elongation ratio of the product.

E20045 S size (90cmx90cm) ¥2,700

*Compatible with A-x Roof Rack S size and M size

E20046 M size (100cmx100cm) ¥3,000

M size (100x100)	160x160	160
L size (120x100)	180x160	150x160

*Elongation rate is measured by hand and may vary.

UNIFAS iGuard Anti-theft Bolt/Nut

General purpose

E20033 For roof rack with foot ¥2,400 set of 2

E20037 For Roof Rack Standard ¥4,500 set of 2

Innovative screw kit with a high degree of security. It is easy to remove and install using a special tool, and the stainless steel used makes it rust-resistant and protects the car in a visually pleasing manner.

Base Sheet for Hooks IN103

General purpose

E20032 For 4 hooks ¥800 4 sheets

E20034 For 6 hooks ¥1,200 6 sheets

Protective sheets to prevent scratches on the roof when the car carrier is installed. Can be securely attached to curved surfaces and peeled off without leaving adhesive residue. The micro-adhesive type prevents dust from penetrating for a long period of time and protects from scratches. The special transparent sheet makes it inconspicuous.

A-x Awning General purpose

E20120 2.0m(W)x2.5m(L) approx. 8kg ¥33,000

The unified design of the same brand is even more impressive when combined with the A-x Roof Rack. Easy to set up and take down. It fits neatly into the side of the roof rack without affecting the cargo bed, and the load capacity remains the same. The canvas is made of 420D oxford and has a water pressure resistance of 3000mm, which is a sufficient spec. The telescopic aluminum poles can be adjusted freely according to weather and sunlight. The soft case is also durable and can be used with peace of mind. Pegs and guy ropes are included. *Can also be attached to roof racks from other manufacturers if the size fits.

For A-x Roof Rack with Foot Awning Mounting Stays General purpose

E20110 Set of 2 ¥7,700

E20111 Set of 3 ¥9,000

Exclusive for A-x Roof Rack with Foot. Made of stainless steel, with bolts necessary for attaching to the roof rack. The long holes are compatible with all awning manufacturers. The mounting pitch is 40-50mm, and the bolts are M6 or M8. Bolts and nuts for attaching awnings are not included.

For A-x Roof Rack Standard Type Awning Mounting Stays General purpose

E20112 Set of 2 ¥11,600

E20113 Set of 3 ¥17,400

Stainless steel stays for attaching an awning to the A-x Roof Rack Standard Type. Completely bolt-on, no modification required. Includes all necessary bolts for attaching to the roof rack. All bolts are made of rust-resistant stainless steel. The mounting pitch is 35-65mm, and the bolts are M6 or M8. Compatible not only with A-x awnings, but also with awning products from other awning manufacturers; products from ARB and BLAST TRAIL have been tested for compatibility. *Bolts and nuts for attaching awnings are not included.

LED Tail Lamp For JB64/74

Original all-LED tail lamps. Can be installed on both stock and external bumpers. Blinkers (16 LEDs per side) are sequential outward (switchable to normal lighting). LED bar type (34 LEDs per side) for the small lights, 25 LEDs per side for the brake lamps, and 6 LEDs per side for the back-up lamps. Includes a resistor to prevent high-flash, ABS lamps, and ESP lamps from illuminating incorrectly.

Clear/Red bar

E00160 ¥31,000 right/left set

Light smoke/Red bar

E00166 ¥31,000 right/left set

Coupler-on Resistor Set for LED Blinker

For JB64/74

E00089

¥1,800 set of 2

These resistors prevent the high-flash that occurs when converting from incandescent bulbs to LED Blinkers. It is a general-purpose product and can be used with our LED front winker lamps. No damage to the wiring, just plug in the coupler. It works reliably and has excellent durability.

Resistor Mounting Plate Set of 2 for LED Blinker Lamps

For JB64/74

E00088

¥860 set of 2

Aluminum plates to fix the resistor attached to the coupler-on resistor or LED blinker. The large aluminum plate acts as a heat sink, and by using the existing screws and holes in the car body to directly fix the resistor to the steel plate part of the body, heat conduction is improved and the resistor, which generates a lot of heat, helps to dissipate the heat. The threaded hole pitch of the resistor is 46mm.

LED license plate light, genuine replacement type Set of 2

For JB64/74

E00132

¥1,800 set of 2

Use of high brightness LED. Power saving and long life compared to genuine halogen lights. Built-in Coupler connection make installation easy. Installation requires work such as removal of the bumper.

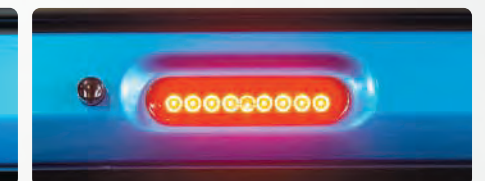

LED High Mount Stop Lamp Type 2

For JB64/74

E00083

¥4,500

Uses 9 high-brightness LEDs. Can be installed without modification. Comes with a tool for removal. Lens color is one type of smoke.

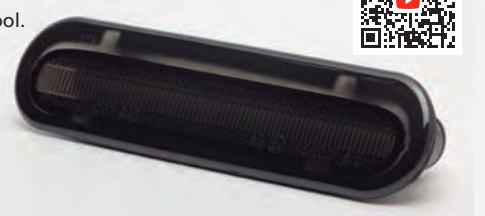

LED High Mount Stop Lamp Type 3

For JB64/74

E00085

¥4,800

The finely segmented bar type lens cut gives a cool impression. Lens color is smoke. Easy to install, just replace the factory high mount lamps. No troublesome wiring work is required. Comes with removal tool.

JB64/74

INTERIOR

Common interior for JB64/74

Steering Wheel

For JB64/74

Slightly thicker than the factory steering wheel, with a cross-sectional shape that emphasizes operability. It is easy to grip and has a great feel to the touch. The shape of the thumb rest (the hollow part at 9-3 handle position) has also been optimized to ensure comfort. The frame is made of lightweight yet strong aluminum. It contributes to rigidity and safety. The air bag, switches, and covers are used as they are from the factory, making it compatible with all grades of JB64/74. All fabrics are made of genuine leather.

Combination Steering Wheel Real Carbon

¥36,000 each

Beautiful texture unique to real carbon. The natural depth that cannot be expressed by printing such as hydraulic transfer is realized. Layers and layers of clear paint also make the carbon cloth stand out even more. Stitching color can be selected from red and black.

Leather-wrapped Steering Wheel High-end Model ¥34,000 each

Higher grade leather is used than the standard model, and smooth leather and perforated leather are used according to the part to be operated to improve the quality feel. Baseball type stitch pattern is used. It is less likely to come into direct contact with the threads, and has improved durability. Stitching Four colors are available: red, black, silver, and yellow.

Hand-stitched by Japanese craftsmen.

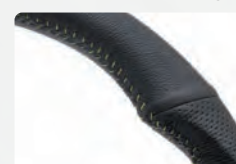

100125 Red Stitching

100126 Black Stitching

100127 Silver Stitching

100128 Yellow Stitching

Leather-wrapped Steering Wheel Standard Model

¥22,000 each

Perforated genuine leather is used for a comfortable feel in the hand and improved texture. European type stitching is used, and the red stitch color adds accent to the all-black steering wheel. Black stitch color is also available, so please choose according to your preference.

100110 Red Stitching

100130 Black Stitching

Steering Boss For JB64/74 100109 ¥13,000

This boss is indispensable when converting to an external steering wheel such as NARDI or MOMO. The steering wheel is a part that is in constant contact with the driver's body, so it is important that the steering wheel is easy to operate and feels comfortable to the touch. You can choose from small diameter, large diameter, D-shape, deep cone type, etc., and convert it to your favorite steering wheel for a comfortable driving experience. The atmosphere around the cockpit that cannot be experienced with a stock steering wheel will surely enhance your mood. Harness and screws necessary for installation are included. Compliant with safety standards. Made by Works Bell.

Steering Wheel Cover

For JB64/74 ¥3,200 each

PU leather is used, which has elasticity close to that of genuine leather and is pleasant to the touch. The steering wheel cover is made of staggered and flat stitches, which are elastic and strong. The more you use this handmade product, the more comfortable it becomes in your hand and the more stable it becomes even after long hours of driving. The vintage feel of this product coordinates well with the Seat Cover Old Series.

RECARO

Showa GARAGE is an authorized dealer of RECARO seats.

The monocoque frame structure was adopted to achieve uncompromising hold, comfort, and safety. The combination of high density and high quality urethane foam, exclusively designed with our original know-how, is effective for long distance and long hours driving. The seat is ergonomically shaped to trace an ideal posture for a driver to avoid fatigue. RECARO has been developing lightweight models for many years by using a resin composite framework that has little effect on weight, and its reliable quality has made it a genuine product of many automobile manufacturers in Europe, the U.S., and Japan.

Storage pocket exclusively for JB64/74AT models. It is easy to reach when you need it and convenient to put in and out. It does not interfere with shifting, steering wheel operation, or pedal operation. Two gusseted pockets, two mesh pockets, and one removable pocket can be used for different purposes. There is also a storage pocket on the passenger's side, which is a nice feature for passengers. Installation is as simple as placing it over the shift section. It is designed specifically for the car model, so it fits perfectly. Durable fabric is used to prevent scratches around the shift area.

Aluminum Assist Grip For JB64/74

one	100170 Silver	100172 Red
¥2,500 each	100171 Black	100173 Blue
Set of 3	100175 Silver	100177 Red
¥7,000 each	100176 Black	100178 Blue

High-grade aluminum material is anodized in a colorful finish. The glossy texture with good coloring adds color to the interior. The high rigidity of the assist grips is evident when gripping them, which is not the case with the stock grips. The grip is comfortable to hold and provides an excellent fit. The anodized surface is resistant to rust and corrosion and durable. Easy installation with a single screwdriver. *Installation screws included.

LED Room Lamp For JB64/74

¥2,000 each
with remote control **¥3,800**
High brightness 3-chip SMD is used for outstanding brightness. For front lamps and rear luggage lamps. The remote control type has 16 levels of brightness adjustment.

3D Non-slip Mat For JB64/74

Perfect size for JB64/74. The 3D structure prevents leaks and stains. The tray-like outer perimeter and edges on the sides prevent mud and dust from splattering. Washable in cold water and easy to clean even when soiled. The material is excellent in heat resistance, weather resistance, ozone resistance, and durability against deterioration over time. Front floor mats and luggage mats are embossed on the surface to prevent slipping.

Excellent durability and water resistance. Lightweight. The mat and luggage will not shift easily.

Non-slip Luggage Mat Type 2 For JB64/74 100157 ¥6,300 *XG is not available.

Flat type luggage mat exclusively designed for JB64/74 and made of highly durable material. The surface of the product is embossed to prevent slipping. When not in use, it can be rolled up for storage to make effective use of the rear seat and luggage space. Comes with a bright blue Showa Garage tag.

JB64/74

From city driving to off-roading, it can be used for all kinds of purposes.

Showa GARAGE Undercarriage Development Concept
Based on the idea that “even tough suspension that can handle rough roads can also be comfortable for city driving”, we first thoroughly test the bike under various on-road conditions, and then finish it off to a state that is fully satisfactory. After that, we carry out careful testing again off-road, and then make final adjustments before completing the product. On-road, it has a comfortable ride and natural handling with minimal unwanted rolling. Off-road, it has excellent maneuverability and good road-holding, so you can ride with peace of mind. For those who want to go off-road in earnest, simply removing the front stabilizer will dramatically improve its off-road performance.

SUSPENSION Suspension Parts for JB64/74

20mm Lift-up Kit For JB64/74

This kit allows you to easily lift up the suspension without changing the ride quality. The shock extension bracket prevents the shocks from stretching out. Recommended tires are [JB64]185/85R16 or [JB74]215/75R15, which are one size larger than the stock tires.

Set includes Aluminum coil spacer, Long brake hose, Shock extension bracket

S00300 ¥24,800

1-inch Lift-up Kit For JB64/74

The amount of lift-up is 1 inch (25-30mm) when installed on JB64. The spring rate is increased compared to the stock, and the ride quality becomes more firm. We recommend larger tires [JB64] 185/85R16 or [JB74] 215/75R15. An extension bracket is included to prevent the shocks from stretching out.

OHLINS Shock Absorber S00141 ¥400,000

Shock absorbers made by OHLINS, the world's top manufacturer, exclusively for Jimny.

Showa GARAGE is an authorized dealer of Ohlins Suspension. As the name of the 4x4 line "Adventure" series suggests, you can enjoy excellent performance and driving in various scenes from street to off-road. Large capacity reservoir tank and wide range of rebound and compression damping force adjustment provide sure stroke and stable ride comfort.

Precautions For JB64 XC and JB74 JC grade, ride height sensor correction stay is required separately.may be necessary.

About Vehicle Inspection

- To compensate for the reduced visibility of the immediate left side due to lifting, it is necessary to secure visibility by means of a camera, etc.
- Even if the vehicle height is increased by 40mm or more by replacing the coil springs, the coil springs are designated parts * and thus do not require a structural modification inspection and will pass the vehicle inspection without modification.
- * Designated parts are automobile parts that are highly likely to be added or changed according to the preferences of the automobile user, and which are not considered a hindrance to ensuring safety or preventing pollution. The parts are specified in the "Notice of the Director-General of the Japan Automobile Traffic Bureau No. 234 and No. 262 of the Ministry of Transport, dated November 16, 1995. When these parts are installed with bolts or adhesives, it is not necessary to change the description on the vehicle inspection certificate or to go through structural change inspections, etc.

ENNEPETAL E-12 Shock Absorber For JB64/74

S00400 For normal ride height **S00401** For 1 inch up

S00402 For 2 inch up **1car ¥170,000** each

Showa GARAGE Setting

ENNEPETAL is handmade one by one using high precision German Bilstein parts. This ENNEPETAL E-12 is a special model for JB64/74 with Showa Garage's original settings. This is a suspension that has been tested and adjusted many times and fine-tuned to demonstrate the full potential of the JB64/74. It is equipped with a damping force adjustment mechanism not found in the standard BILSTEIN, and offers the best ride quality and driving comfort while responding to a wide range of road conditions. The wide range of 12-level damping force adjustment covers a wide range of driving conditions from on-road driving such as winding roads and highways to off-road driving such as flat dirt roads, everyday use such as city driving, and sports driving. A dial on the top of the absorber allows easy adjustment with a comfortable clicking feeling.

Shock Absorber	Front		Rear	
	Max. length	Min. length	Max. length	Min. length
Genuine (mm)	409	269	451	302
1 inch up (mm)	432	290	490	343
Normal (mm)	420	278	461	326

1-inch Up Kit ENNEPETAL E-12 Set For JB64/74

This 25mm (1 inch) up is popular with people who want a combination of everyday practicality, style and a certain degree of performance. Compared to the standard, it provides a firmer ride. However, in the case of this Showa Garage Original Setting E-12, a comfortable ride is ensured and it is not related to the tightness that is common in tuned dampers. By making moderate adjustments while taking advantage of the standard's comfortable ride, it suppresses excessive roll and changes to a calm feeling. By making the most of the excellent operability that is unique to mono-tube dampers, it offers a higher level of comfort, such as improved handling and stability during sports driving, and a supple, soft, silky ride that envelops the bumps in the road during everyday use. Recommended tire sizes: [JB64] 185/85R16 [JB74] 215/75R15

SG Adjustable Coil 50 ENNEPETAL E-12 Set For JB64/74

An all-rounder that strikes a balance between driving and appearance. Load clearance that gives you a sense of high lift. Moderate ride height and center of gravity combine comfortable daily driving with excellent off-road performance. When equipped with Showa GARAGE SG Adjustable Coil 50, it provides a tight ride with moderate damping that is not too hard, and natural handling with less excessive roll. The wide range of 12-level damping force adjustment mechanism covers a wide range of driving conditions from on-road driving such as winding roads and highways to off-road driving such as mogul and dirt roads, everyday use such as city driving, and sports driving. Recommended tire sizes are 185/85R16 and 195R16; 225/75R16 is also available.

JB64/74

SUSPENSION

Suspension Parts for JB64/74

A suspension kit that has a 14-level adjustable shock absorber that can be adjusted to suit a wide range of riding styles, and that also improves off-road driving performance while also pursuing a comfortable ride for city driving. Steering dampers that increase damping force and reduce the recoil when large-diameter tires are fitted, etc. The Showa Garage original brand “X-SHOCK” supports all kinds of suspension needs, from everyday use to serious off-road driving.

X-SHOCK For JB64/74

The 14-level adjustable X-SHOCK absorber can be used for everything from city driving to off-road driving. There are three types for 1, 2 and 3 inch height increases. The X-SHOCK can be adjusted to suit a wide range of on- and off-road driving styles, and can also be used with a genuine specification without a sway bar. The 1 inch height increase type can also be used with the standard vehicle height, and even if you increase the height, there is no need to worry about interference between the cross member and the there is no need to worry about interference between the cross member and propeller shaft, and it can be installed in the standard state (only the left rear brake hose needs to be replaced). For 2-3 inch up, countermeasures against interference with the cross member or replacement is required. In addition, the long brake hose needs to be replaced.

Shock Absorber	Front		Rear

2 inch up	460	290	515	327
3 inch up	480	300	540	340

1-inch Up Kit X-SHOCK Set For JB64/74

It is capable of all-around driving from city driving to off-roading, with reduced roll and a firm ride. For JB64, 1 inch up (25 to 30mm) is required. The 14-level adjustable X-SHOCK (cross shock) absorber can be adjusted to suit various specifications and riding styles both on-road and off-road, and can also be used with the sway bar removed. Bush for correcting front caster angle and front and rear lateral rods for adjusting hosing misalignment are also included in the lathe set. Recommended tire size [JB64]185/85R16, [JB74]215/75R15.

The photo shows the standard set.

Precautions For JB64 XC and JB74 JC grade, ride height sensor correction stay is required separately, may be necessary.

X-SHOCK Steering Damper

For JB64/74

S00115 ¥20,000

This is a steering damper with increased damping force to reduce the impact from the road when large diameter tires are fitted. It is made by KYB, the same manufacturer as the genuine product, so you can be sure of its quality and performance. It has the same shape as the standard product and can be installed with bolts.

SG Adjust Coil 50 X-SHOCK Set

For JB64/74

The ride height is raised by 50mm (2 inches), and compared to a set that can be comfortably driven from on to off with a 75mm (3 inch) increase, the ride is softer. By cutting the part where the upper part of the spring closely connected area, it is possible to adjust the amount of height increase and the balance of the front and back without affecting the spring rate. The 14-level adjustable X-SHOCK absorber can be adjusted widely to suit various driving styles, and it can also be used for serious specifications without stabilizers. The standard set is an all-in-one set of essential parts, and the B

High Capacity Bump Rubber For JB64/74

Front **¥8,400** each/set of 2

S00068 For Front Hard

S00069 For Front Soft

S00070 For Front Super Soft

Rear **¥6,600** each/set of 2

S00071 For Rear Hard

S00072 For Rear Soft

S00073 For Rear Super Soft

Bump rubbers significantly increase capacity compared to genuine. Overall length is 125 mm, approximately 65 mm longer than genuine. Can be easily cut with a cutter knife and adjusted to suit the application. Bolt-on installation. The front bump rubber is about 80mm longer than stock with the included 15mm spacer. If you cut the plate where the genuine bump rubber fits, you can install without using the spacer, and you can install without sacrificing (cutting) the capacity of the bump rubber for the clearance (15mm) that is created. Choose the hard type (hardness 70) for use in bumping regulations, or the soft type (hardness 60) for shock absorption in speed competitions. Super soft type (hardness 50) has excellent shock absorption and can be used for both front and rear bumps in speed competitions, but is especially recommended for rear bumps. For reference, all genuine bump rubbers have a hardness of 70.

Essentials for off-road driving

Necessity of bump rubber with larger capacity

The shock absorbing power is greatly increased. Also, by extending the overall length, bump rubbers can be used to prevent contact between the tires and the body, and to reduce body sway. In addition, it can be regarded as a "second spring" with a high spring rate, and can provide a sense of stability when cornering on-road as well as off-road.

Rear Bump Block Exclusively for high-capacity bump rubber

For JB64/74

S00028 **¥6,000** right/left set

Aluminum block and bolt set for installing high capacity bump rubbers inside the rear coil springs. The spring acts as a support and will firmly hit the hosing in any situation. Bolt-on

installation, enabling W-bump specification.

*Need to purchase High Capacity Bump Rubber Repair separately.

Rear Bump Extension Block for high-capacity bump rubber

For JB64/74

S00037

Full set **¥7,000** right/left set

S00038

50mm **¥4,800** right/left set

S00039

25mm **¥2,800** right/left set

This is a set of extension blocks and bolts for shortening the rear high-capacity bump rubber. By shortening the bump rubber, it reduces swaying and bending for a more stable touch. 25mm and 50mm can be used as a set for 3-step adjustment up to a maximum of 75mm.

High Capacity Figure-8 Bump Rubber For JB64/74 rear

¥3,300 each

S00015 Hard (hardness 70)

S00016 Soft (hardness 60)

S00017 Super soft (hardness 50)

Bracket (sold separately) is required for installation.

Compared to conventional figure-8 bump rubbers, the hollow portion has been reduced to 1.5 times (50mm) thicker, 1.25 times (100mm) taller, 84mm wider, and 2.4 times larger in capacity. The rigidity of the product itself is increased, so it is less likely to warp or sag, and it hits the hosing more firmly. The mounting portion has been machined with long holes, allowing adjustment of the contact position. Choose the hard type for those who want a firm hold, and choose the soft or super soft type for those who want shock absorption.

Comparison with the figure-8 bump rubbers sold in the past. The capacity is approximately 2.4 times larger

Bump Bracket for high-capacity figure-8 bump rubber For JB64/74

S00033 For rear **¥8,800** right and left set

Bracket for mounting a high-capacity figure-8 bump rubber on the rear (25 mm high). Conventional figure-8 bumps can also be installed. Mounting holes on the bracket are pre-machined with long holes for front/rear position adjustment. Bumps are mounted using button bolts to prevent damage during full bumping.

Quick Body Mount For JB64/74 **¥6,000** 1 car

S00160 Street 60

The loose impression of the genuine body is replaced by a sharp ride. Recommended for those seeking a sportier feel without losing daily comfort.

S00161 Sport 70

Compared to the Street 60, the Street 60 transmits more minor vibrations and sounds, but this increases the direct feeling and makes the sensations transmitted from the tires and suspension easier to understand.

Eliminates the side slits in the genuine bushings to increase rigidity. Two types of bushings with different hardness, Street 60 and Sport 70, are available for different applications. The bushings reduce the yawing between the body and frame, improve turning performance, reduce body shake and roll, and transmit the sensation from the undercarriage. There is no change in ride height when replacing the mounts. Effective not only for vehicles with deteriorated mounts, but also for new vehicles and body lifted vehicles. It can be used for a wide range of applications from street driving to competitions and sports driving. This set is designed to replace only 8 parts, which can be done in a short time without the need to detach the frame. You can experience the effect of replacing only half of the 16 parts.

OTHERS Other parts for JB64/74

ABS & Air Pipe Correction Stay

For JB64/74 **S00150** **¥1,400**

This stay corrects the ABS wiring and air hoses that lose room when the vehicle is lifted, and is essential when replacing the absorber with one that is 2" or 3" higher. One stay is used for the front.

Height Sensor Correction Stay

For JB64/74

¥1,300 each

For 2 to 3.5

S00151 For 0.5 to 1.5 inches up

S00152 For 2 to 3.5 inches up

Correction stay for auto-leveling mechanism of JB64 XC/JB74 JC. Required when lifting. Two types are available, one for 0.5~1.5" and the other for 2~3.5".

Rear Shock Extension Bracket For JB64/74

S00075 **¥5,000**

Extends the free length of the shock by 35mm. Eliminates the lack of length.

Rear Shock Spacer Set For JB64/74

S00111 **¥2,600**

Spacer set to prevent interference between rear shock and coil spring. Set includes 2 x 10mm spacers and 2 x long bolts.

Front Shock Guard For JB64/74 **¥11,500** each / set of 2

S00500 Gunmetal

S00501 Red

S00502 Black

S00503 Blue

Securely guards the bracket on the underside of the front shock. Protects from impact and improves running performance. Steel 4.5mm thick. Total 4 colors. Installation requires enlarging the hole.

Pitch Gauge for Bush Press Fitting (simple type)

General purpose **S01004** **¥1,500**

This is a gauge for press-fitting an eccentricity bush into the reading arm to match the pitch of the genuine part. This is for the front (148mm) only.

Bush Press Fitting Fixture Set

General purpose **S01000** **¥12,000**

Set of press fitting jig for replacing bushings on the leading/trailing arm and gauges (front and rear) to press-fit the bushings to the factory pitch.

Propeller Shaft Spacer 10mm

For JB64/74

S00019

¥7,600

Prevents the constant velocity joint of the rear propeller shaft from coming off at full rebound. Depending on the absorber used, this item is necessary for off-road driving with a ride height increase of 3 inches or more.

Manual Hub Installation Kit For JB64/74

D00030 For JA22 freehub **¥7,000**

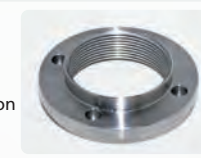

D00031 For JA11 free hub **¥11,400**

This kit is designed to replace the air locking hubs adopted from JB23 with the manual hubs equipped on JA11 and other models. The air locking hubs are difficult to visually check the locking status and may malfunction due to mechanical problems such as negative pressure leakage, etc. Therefore, it is recommended to replace the air locking hubs with manual hubs that are highly reliable and work reliably in an emergency. *A genuine Suzuki free hub for JA11 or JA22 and a cone washer to install the free hub are separately required.

Hub Nut Without Brim

For JB64/74 **D00032** **¥3,000** piece

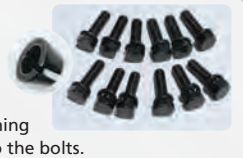

For repairing the manual hub installation kit (sold separately). Sold as a single unit. Cannot be used on vehicles with stock air locking hubs. Instruction manual is not included as this is a repair part.

Bolt Set for Free Hub For JB64/74

D00025 **¥3,200** 《Compatible with all Jinmy models.》

This is a set of high strength bolts, spring washers, and cone washers for fixing the free hubs for one vehicle. The bolts are stronger than the genuine ones, and by increasing the tightening torque, the free hub is firmly secured and prevents damage to the bolts.

Free Hub Cover Gasket

General purpose

D00016 **¥180** Sheet

Suzuki part number 43813-60A00. This gasket is used for the front suspension free hub. One gasket is used on each side and two gaskets are used for one car.

Free Hub Packing

General purpose

D00015 **¥160** Sheet

Suzuki part number 43842-80001. These gaskets are used for the front undercarriage free hub. One packing is used for one side, and two are used for one car.

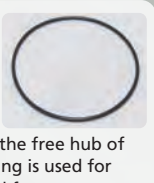

Free Hub O-ring

General purpose

D00014 **¥290** piece

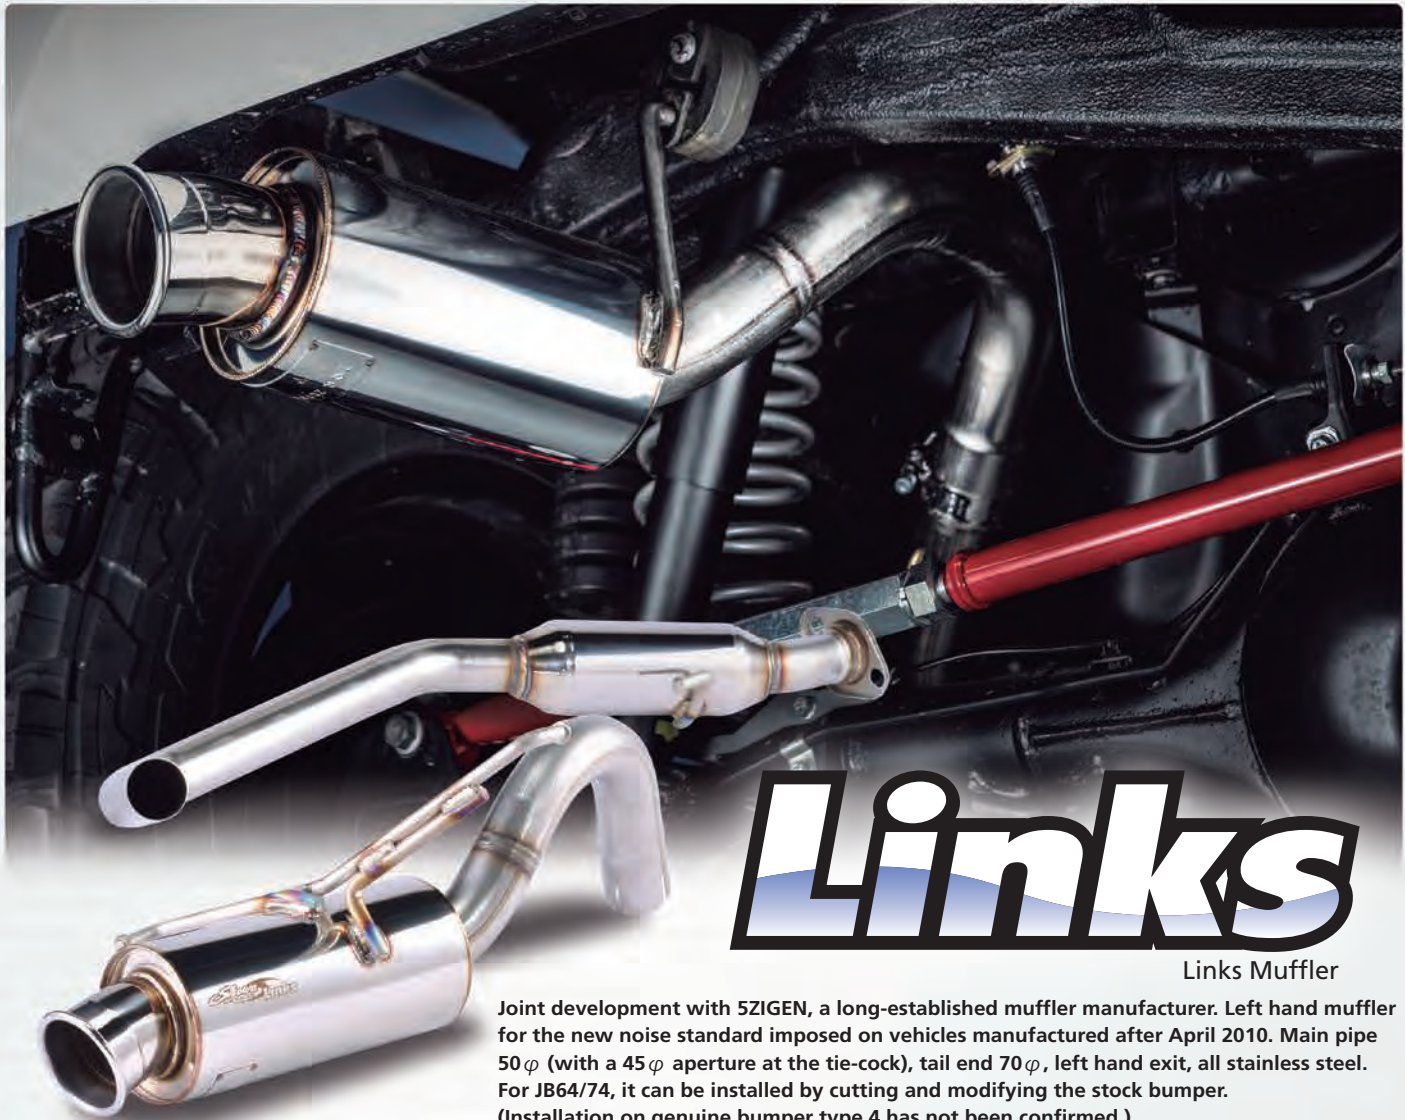

Suzuki part number 43838-60A00. o-rings are used in the free hub of the front undercarriage. One O-ring is used for one side and two O-rings are used for one car.

JB64/74

MUFFLER

Muffler for JB64/74

Links

Links Muffler

Joint development with 5ZIGEN, a long-established muffler manufacturer. Left hand muffler for the new noise standard imposed on vehicles manufactured after April 2010. Main pipe 50φ (with a 45φ aperture at the tie-cock), tail end 70φ, left hand exit, all stainless steel. For JB64/74, it can be installed by cutting and modifying the stock bumper. (Installation on genuine bumper type 4 has not been confirmed.)

for **JB64**

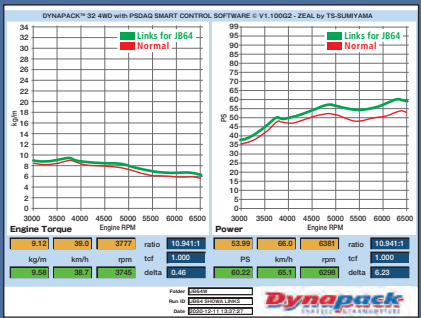

Proximity noise value:86dB
Acceleration noise value:76dB

《Compliant with new standards》

P00004 ¥62,000

The engine has enough torque at low rpm and blows up to high rpm comfortably with moderate volume.

Torque 0.5kgm Power 6.2PS Up!!

for **JB64**

Proximity noise value:79dB
Acceleration noise value:75dB

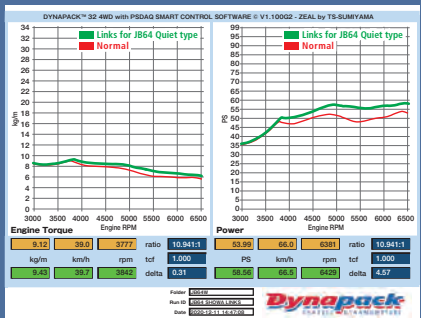

Quiet type

《Compliant with new standards》

P00006 ¥68,000

The use of a large silencer suppresses noise volume, low speed range is the same as normal, and torque in the mid-speed range has been increased. Recommended especially for A/T vehicles.

Torque 0.3kgm Power 4.6PS Up!!

for **JB74**

Proximity noise value:87dB
Acceleration noise value:75dB

《Compliant with new standards》

P00005 ¥68,000

Smooth and stress-free acceleration up to the high rpm range characteristic of NA cars. It also has enough torque at low rpm.

JB 64/74用

Comfort Muffler P00007 ¥63,500

Fits to JB64/74 stock bumper without modification.

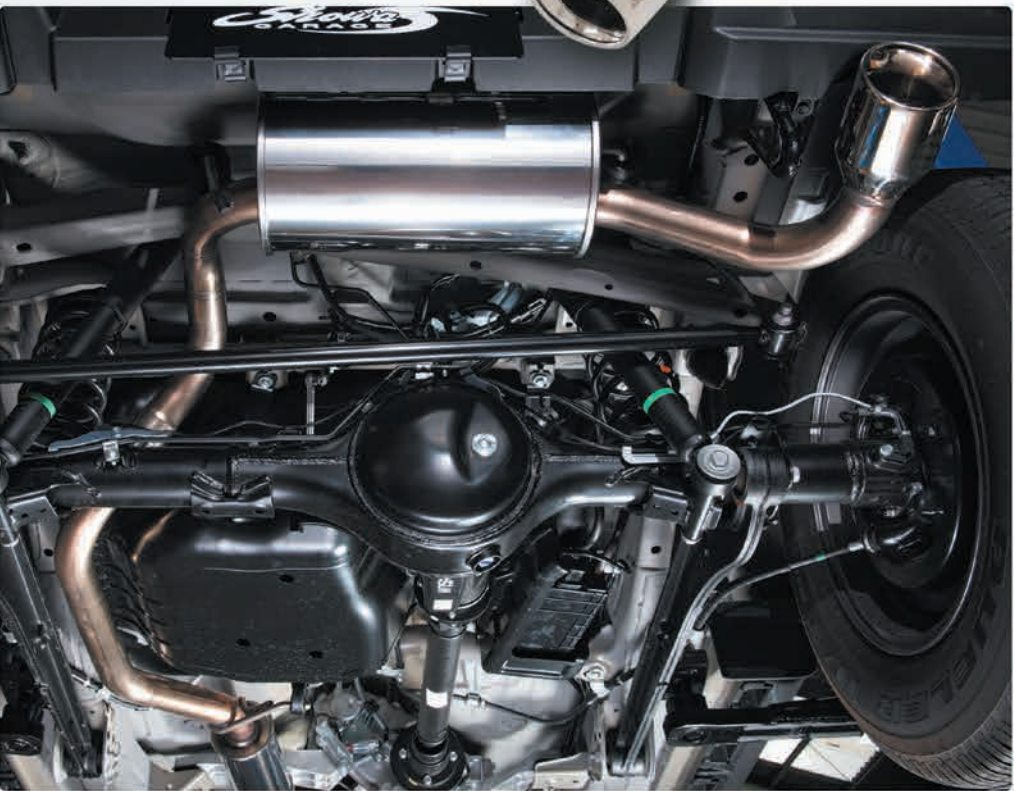

Compatible with the new noise standard for vehicles manufactured in April 2010 or later (in Japan).

JB64/Proximity noise value: 77dB Acceleration noise value: 76dB

JB74/Proximity noise value: 86dB Acceleration noise value: 75dB

(Main pipe 50φ, tail end 89φ, all stainless steel)

Muffler for stock bumper jointly developed with long-established muffler manufacturer 5ZIGEN. It can be bolted on with the stock bumper. Although not flashy, the muffler has a subtle presence that is different from the understated look of the factory muffler. The exhaust sound is also thick and high quality while keeping the volume to a certain extent. It present the sophisticated sound. The large silencer is placed at the rear end and the middle silencer is made smaller to ensure minimum ground clearance and at the same time to improve quietness. The exhaust efficiency has been improved by replacing the middle pipe, allowing the driver to enjoy a smooth and pleasing response. The new silencer is easier to ride and more enjoyable to drive. (JB74 Type 4 is not compatible.)

JB64/74

SOUP-UP Soup up parts for JB64/74

Powered ECU

TUNED BY SHOWA GARAGE

The control maps are optimally adjusted to unleash the true potential of the JB64/74. The lineup includes Spec1 for regular gasoline and Spec2 for high-octane gasoline. This is an easy yet highly effective tuning menu. This powered ECU updates the JB64/74 to have a sharp, lively, and aggressive feel. It will definitely transform the power to a level that can be felt. Of course, we avoid settings that unnecessarily pursue peak power only, and focus on the feeling of everyday use. The vehicle is faithful to the accelerator pedal operation and accelerates comfortably on general roads, highways, and off-road. The cruise control setting can also be changed to comply with the increased speed limit on highways. (For JB74 only)

for JB64

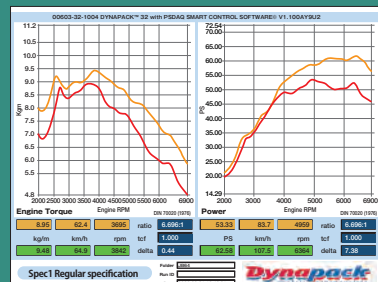

Spec1

Increased power with emphasis on easy handling at low to mid speeds. Improved response makes the JB64 "easy to drive".

For JB64 P00037 Regular specification ¥50,000

*Spec1/2 includes "Cruise Control Upper Limit Change" in the set contents. We recommend replacing the plugs to match the improvement in driving performance.

GReddy Oil Cooler Kit For JB64/74 P00060 ¥62,000

This oil cooler uses a large-capacity core with offset fins in the core tube to reduce pressure loss and improve heat dissipation. The high heat dissipation prevents excessive temperature rise inside the engine and keeps the oil for lubrication and cooling at the proper temperature. The metallic blue accented body is visible through the grille and other openings, providing a dress-up effect.

Option P00061 Sensor adapter M18 Warning ¥1,200/piece
P00062 GReddy Oil cooler sensor terminal M18 ¥2,500

Showa Garage Original

Aluminum turbo piping set

JB64用 ¥36,000 each

S00500 Polished S00501 Black
S00502 Red S00503 Blue

Reduces pressure loss during boost and improves engine response. Piping kit with aluminum pipe joints from the turbine to the intercooler and throttle body. The use of aluminum for the body material and silicone for the joint parts ensures durability and safety. By replacing the factory rubber pipe with an aluminum pipe, durability is increased and at the same time, deformation caused by strong expansion during supercharging is prevented and compressed air flow is smoothed out. Optimal pipe diameter and curvature have been selected for the intercooler inlet/atlet pipe and throttle pipe to reduce pressure drop. This will improve engine response. The silicone hoses used in the joints also have a multi-layered structure with high heat and oil resistance to reduce loss due to heat and pressure. The same layout as the factory allows for bolt-on installation without any interference between parts. The bright polished finish and the brilliant color of the wrinkle coating add a touch of color to the inside of the engine compartment.

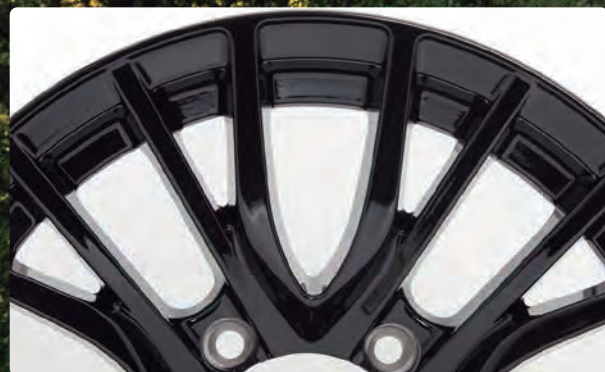

Vehicle Stability Control Canceller (VSCC) For JB64/74 P00024 ¥39,900

Deactivates traction control and anti-skid system (vehicle stability control). The genuine cutoff switch (operation) leaves some of the electronic controls in place, which can be detrimental when driving aggressively in sports driving situations, for example, when the driver is unable to control the vehicle as he/she wishes. With this device, the control can be deactivated at the touch of a button, leaving only the ABS in place and allowing the driver to enjoy the pure enjoyment of driving by suppressing behavior contrary to the driver's wishes. This is an indispensable item for serious off-road driving that requires a daring sliding technique, such as steep hill climbs with tires spinning. The status memory allows the engine to be turned on again when the engine is turned off and restarted.

SR432

For JB64 JB23 W00053 Matte Black W00054 Gloss Black W00058 Matte Bronze ¥26,500 each Size 16×5.5J +20 Weight 8.0kg
For JB74 JB43 W00056 Matte Black W00057 Gloss Black W00059 Matte Bronze ¥27,500 each Size 16×6.0J -5 Weight 8.5kg

The original SR432 aluminum wheel has mesh cross spokes, which is rare for Jimny. The rich expression of the straight and curved spokes, which have a difference in height, is a characteristic appearance that evokes a sense of elegance and sportiness. The concave design further accentuates the style of the center section. Like the wheels that adorn the feet of luxurious premium saloons, the taste that emits an aura of a higher rank is best suited for the dressed-up urban style.

M TYPE-M

Showa Garage Design's original aluminum wheels with a distinctive concave shape. In contrast to Showa Garage Design's original X-Line aluminum wheel, which has a simple straight line design, the TYPE-M has a rich, three-dimensional and crisp design. If the X-Line is "static", the TYPE-M is "dynamic". It has a sense of presence that will not be defeated by flashy customization.
*Inset 20 is for the Jimny, and inset 0 is for the Jimny Sierra.

X-Line

X-Line For JB64 JB23 ¥24,500 each
Size 16x5.5J +20 Weight 6.9kg

Original aluminum wheels designed by Showa Garage. The square shape features a simple design based on straight lines. The design makes the spokes look slender and long, creating a foot-lengthening effect and a one-rank larger image. The silhouette, which dares to eliminate curves, is unique and stands out from the many rounded designs. The deep rim shape is achieved by slimming down the reverse side of the rim, making it truly one-of-a-kind.

W00013 Matte Black W00014 Gunmetal

R8

R8 For JB74 JB43 ¥26,500 each
Size 15x6.0J ±0 Weight 6.8kg

Showa Garage's original R8 aluminum wheels have a round hole dish design, which is a royal American style. However, it is not all about retro, but rather a simple look without steps or ribs that has been refined for a modern look. The characteristic egg-shaped hole shape emphasizes the cant (slope) of the hole sides. The silhouette, which is not too old, matches the neo-classic JB74, which is both new and nostalgic at the same time. One-piece construction, casted, with center cap. Available in two colors: matte black for a wild image and glossy black for a dressy look.

NITRO POWER H12 SHOTGUN

NITRO POWER H12 SHOTGUN

For JB64 JB23
W00037 ¥27,300
Size 16x5.5J +20 Weight 8.92kg
For JB74 JB43
W00038 ¥27,800
Size 16x6.0J -5 Weight 9.35kg

Nitro Power H12 Shotgun in the Showa style. Dyed bronze, a color not found in the catalog model lineup, it has been transformed into a style that gives a sense of depth as well as massiveness. The military style matches the tough and wild Jimny, and goes well with the burly off-road tires. The dish shape and 12-hole design give it a rugged and impactful shape. The ribs on each hole emphasize the depth and give a change to the dish wheel that tends to be monotonous. The NITRO POWER logo at the center of the wheel and pierced bolts on the outer circumference express an army taste. The matte finish also gives a tough appearance.

For JB74 JB43 ¥27,800 Size 16x6.0J +5 Weight 8,00kg

Off-road taste is added to the monotone and urban atmosphere of the standard colors. The simple and sporty design is based on the NITRO POWER concept of military ruggedness. The concave spoke cross section and twin spokes with eight spokes hollowed out give an image of ruggedness and wildness. The simple deep rim shape creates a lightweight and three-dimensional appearance. Both rigidity and rugged design are achieved. The brand logo engraved on the center part creates an impactful originality. The high quality Nashikoji finish also provides strong support for SUVs and 4x4s.

VERSUS

MADE IN JAPAN, MADE IN HOUSE

VERSUS VV21SX

For JB64 JB23 ¥42,000 Size 16x5.5J +20 Weight 7.5kg

For JB74 JB43 ¥43,000 Size 16x6.0J +5 Weight 8.3kg

A new proposal from VERSUS, which offers a wide variety of dress-up wheels. The "VV21SX" is a new type of wheel that skillfully combines a sporty and fashionable taste with the functionality-oriented design unique to RAYS. The design incorporates slim Y-shaped spokes pushed out on the top surface and the "relief pocket," an advanced lightweighting technology, for strong rigidity. The unique silhouette of the VV21SX is designed specifically for the "modern Jimny," and it is a vehicle that can be used on or off the road without skipping on performance. The color is Showa's original semi-gelatinized semi-elastomer. The color is Showa's original semi-gloss black.

GRAM LIGHTS 57DR-X

For JB64 JB23 W00030 ¥41,000 Size 16x5.5J +20 Weight 6.7kg

For JB74 JB43 W00033 ¥41,000 Size 16x5.5J ±0 Weight 6.9kg

For JB74 JB43 W00034 ¥41,000 Size 16x5.5J -5 Weight 6.9kg

Original Showa Garage color made in collaboration with RAYS. A deep hyper bronze color that changes color depending on the angle you look at it. The 57DR-X, the successor model of the 57JX, is a 6-spoke design that is a RAYS tradition, but with a new logo design. The center portion is rounded to emphasize the concave line of the spokes. Different depths of the face are available for each inset. The spoke sides are ribbed to give a slim yet powerful impression, and provide sporty appeal and strong support for your feet in all situations, on or off the road. The inset for the Jimny is 20, for the Sierra -5 (*) for an aggressive style, and the inset 0 for a wider choice of tire brands.

GRAM LIGHTS 57JV

For JB64 JB23 W00032 ¥41,000

Size 16x5.5J +20 Weight 6.5kg

Original color wheel made in collaboration with RAYS. Hyper Bronze is a deep color that changes color depending on the angle of view. The on-road sports model 57XTREME was refined for Jimny. The silhouette was changed from 2x6 to 2x5 for a longer leg design and to better match with the larger center bore Jimny. In addition, the aggressive concave design gives it a powerful and intrepid look, while adding a touch of the latest dress-up style to the Jimny, for which it is difficult to adopt a three-dimensional design. The design is designed exclusively for Jimny, and the extreme care taken in its execution has resulted in the expression of a rich three-dimensionality.

A-LAP-J FORGED

RAYS A-LAP-J

For JB64 JB23 W00008 ¥51,000

Size 16x5.5J +20 Weight 4.9kg

For JB74 JB43 W00007 ¥52,000

Size 16x6.0J +5 Weight 5.1kg

The original A-LAP-J by Showa GARAGE and RAYS is a hyper bronze color that changes its appearance depending on the light. Forged 1 piece super sports model seriously built by RAYS for Jimny users with driving performance that surpasses even large 4WD machines. Lightweight performance was pursued to effectively transfer the limited displacement and power to the road surface. The optimal shape, 10-spoke cross section, thickness, and shape were optimized specifically for Jimny, and together with high strength and high rigidity, the lightest Jimny wheel weight of 4.9kg (inset 20) was achieved. Furthermore, the rim and disc shape has been adjusted for each inset to accommodate stock, over fender, and even Sierra models. Machined finish with RAYS & A-LAP-J logo.

*Inset 20 is for Jimny, and inset 5 is for Jimny Sierra.

Wide Tread Spacer Black 30mm 139.7-5H

JB64/74/23/33/43用

W00101 ¥3,600 piece

W00102 ¥7,200 set of 2

W00103 ¥14,400 set of 4

Forged wide tread spacers made of high-strength aluminum material A6061-T6. Can be used for wheel-to-body alignment and suspension setting. The CNC and milling cutting marks on the body are also expected to be highly precise. Anodized surface coating ensures long-term corrosion resistance. The hub bolts are made of chromium molybdenum (SCM435), which is also strong enough.

〈Product Specifications〉

OD 176mm / ID 108mm

JB23/33/43

EXTERIOR Common exterior for JB23/33/43

Front Bumper Spoiler For JB23

Sharp-looking front bumper spoiler, available in painted or unpainted ABS and unpainted FRP gel coat finish. Skid plate (sold separately) is required at the same time. Fog lamps can be installed if the model is JB23-5 or later.

- 《Made of ABS》 E00800 Unpainted ¥34,000
 E00802 Black (ZJ3) E00803 Pearl (Z7T)
 E00804 Khaki (ZVD) E00805 White (26U)
 Genuine color (JPN) ¥49,000 each
 《Made of FRP》 E00030 Unpainted ¥31,000 (gel coat finish)

Front Grille For JB23 E00025 ¥18,000

Larger opening for increased ventilation. FRP gelcoat finish with black mesh net. 1 to 3 models of JB23, JB33, and JB43-2 to 7 models require hood replacement or modification. Can be combined with bad face hood.
 *May cause interference due to individual differences.

Mesh Net General purpose E23000 Aluminum Mesh Net ¥1,700 (100cmx35cm)

Aluminum honeycomb mesh net (mesh size: 18mm x 9mm) and ABS resin honeycomb mesh net (mesh size: 30mm x 13mm) can be freely used for luxurious Euro style or sporty style. The ABS mesh net is flexible and can be shaped by using a heat gun, etc. The aluminum mesh net is painted gloss black. Aluminum mesh net is painted gloss black.

LED License Plate Transfer Kit For JB23/33/43 E00121 ¥10,800 each

The set includes mounting bracket, LED license plate light, and bolts. The LED number lights are made of resin so they will not rust and the LEDs have a long life. Drilling is required for installation. Includes Showa Garage logo sticker.

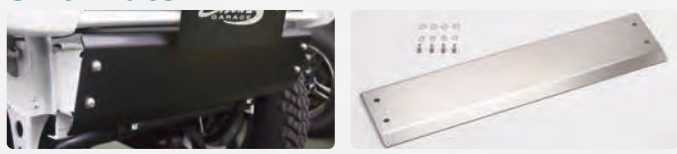

Rear Bumper Spoiler For JB23

Stylish rear bumper spoiler, available in ABS and FRP. The license plate needs to be moved for installation. A separate transfer bracket is required to install the spare tire. ABS spoiler is available in painted or unpainted. FRP spoiler is available in unpainted gel coat finish.

- 《Made of ABS》 E00810 Unpainted ¥32,000
 E00812 Black (ZJ3) E00813 Pearl (Z7T)
 E00814 Khaki (ZVD) E00815 White (26U)
 Genuine color (JPN) ¥47,000 each
 《Made of FRP》 E00032 Unpainted ¥29,000 (gel coat finish)

Skid Plate For JB23

- E00033 Black ¥8,000 E00049 Silver ¥7,000
 Made of 3mm-thick aluminum, black anodized. Mounted by drilling holes at the end of the frame. Includes stainless steel button bolts. not for JB33/43.

Skid Plate with Reinforced Bracket For JB23

- E00034 Black ¥13,000 E00050 Silver ¥12,000
 Tow hooks can be attached. A 4.5mm bracket is placed inside the frame to allow for secure bolting to the frame. Tow hooks with an attachment pitch of 57 mm, such as those made by Taniguchi, can be attached. The plate is made of 3mm thick aluminum.

License Plate Mounting Stay For JB23 E00031 ¥3,000

Set of number stay, reinforcement stay, bolt, and nut necessary to attach a license plate to Showa GARAGE's front bumper spoiler.

LAMP Lamp for JB23/33/43

LIGHTNING LED Tail Lamp For JB23/33/43 E00026 Clear ¥25,000 left/right set

Lighting Design and Technology

LED Fog Lamp Inner Black For JB23/43 ¥12,600 left/right set

- E00014 White E00015 Yellow

Projector fog lamp, 5W x 3LED, IP68 waterproof and dustproof design, with optical axis adjustment function, LEDs in aluminum housing with heat sink, lens and body in polycarbonate, set of 2. Cutting may be required for installation on some external bumpers. Available in two colors: white and yellow.

With the small light on, 9 LEDs (per side) on the LED tube, 12 LEDs (per side) on the brake, and 8 LEDs (per side) on the turn signal will flash. You can switch between sequential and normal lighting. Measures have been taken to prevent the high-flasher and ABS lamp from lighting up. If you want to install this on a JB33 or JB43, you will need to modify the wiring on the vehicle side. 1-year warranty. Fogging due to condensation is not covered by the warranty.

LED Back Lamp For JB23/33/43 ¥6,000 each/right and left set

- E00023 Clear Lens E00024 Smoked lens

8 projector type LEDs (5700k) are used per side. They are much brighter than the genuine ones and ensure safe visibility when driving in reverse, such as when parking the car.

Genuine Shape Fog Lamp For JB23/43 E00017 ¥1,800 piece

Equivalent to genuine product. Glass lenses are used, and the optical axis adjustment function is also included. Sold as a single unit with H11 bulb, E-marked. Requires lamp stay, connector, switch, etc. for installation on models JB23-5 and earlier. Some external bumpers may require modification.

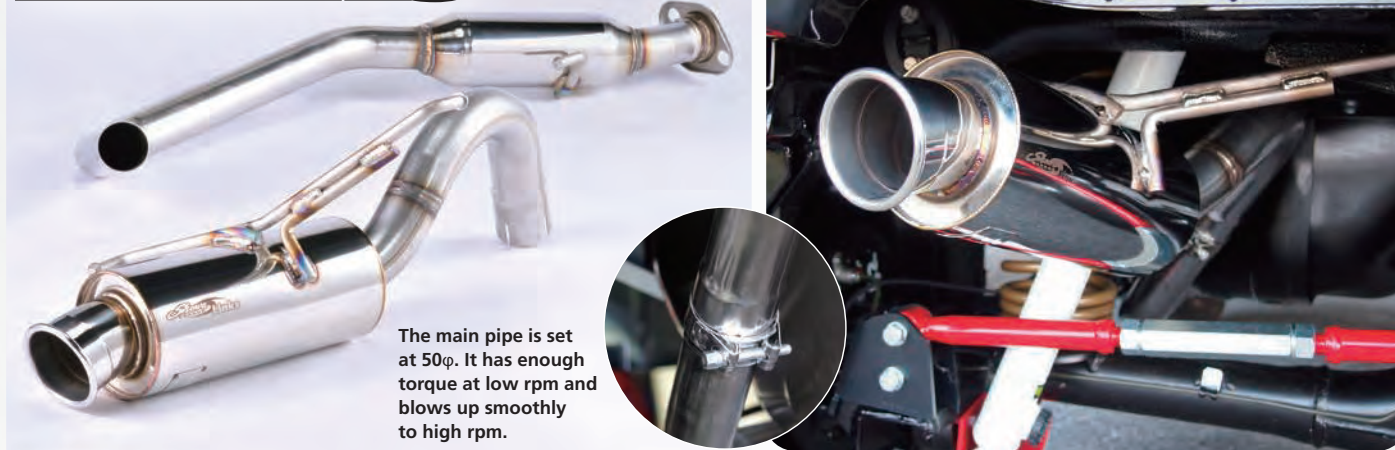

Equivalent to genuine product. Glass lenses are used, and the optical axis adjustment function is also included. Sold as a single unit with H11 bulb, E-marked. Requires lamp stay, connector, switch, etc. for installation on models JB23-5 and earlier. Some external bumpers may require modification.

MUFFLER Muffler for JB23/33/43

Links Muffler For JB23/33/43 P00002 New standard compliant product ¥51,000

《All models of JB23, JB33/43 before March 2010》 Proximity noise value: 87dB Acceleration noise value: 81dB
 Jointly developed with 5ZIGEN, a long-established muffler manufacturer. Left-hand muffler compliant with the new noise standard imposed on vehicles manufactured after April 2010. Main pipe 50φ (with 45φ aperture at the tycoon section), tail end 70φ down shape, all stainless steel. Type S is also available, which is a full 50φ version of the above model without the center pipe muffler and without the aperture in the rear tie-coil. Although it is a straight shape, it has torque at low rpm and blows up smoothly to high rpm.

The main pipe is set at 50φ. It has enough torque at low rpm and blows up smoothly to high rpm.

INTERIOR Interior for JB23/33/43

Aluminum Assist Grip For JB23/33/43 ¥7,000 each/set of 3 ¥2,500 each/one

- 100175 Silver 100176 Black 100170 Silver 100171 Black
 100177 Red 100178 Blue 100172 Red 100173 Blue

The high-quality aluminum material is anodized in a variety of colors. The bright colors and glossy texture add a touch of elegance to any interior. The genuine assist grip provides a high level of rigidity that you won't find in a genuine assist grip. It also has a great feel and fit. The anodized surface is also resistant to rust and corrosion, making it durable. Easy to install with just one screwdriver. *Installation screws included.

Clutch Start Cancel Switch For JB23/43 000012 ¥6,300 unit

《Compatible with JB23-5 or later and JB43-4 or later》

Turn the switch ON to start the engine without stepping on the clutch, and turn it OFF to return to the normal state. This can be used for off-road driving or in an emergency to start the car by turning the cell

phone while the car is in gear. It can also be used conveniently when using a bed kit for overnight stays in the car.

JB23/33/43

SUSPENSION

Suspension Parts
for JB64/74

For those who mainly drive for competition and off-road...

SG Adjustable Coil 60 For JB23/33/43 S00040 ¥35,000 per car

By cutting the upper part of the coil where the wires are closely connected, it is possible to adjust the ride height and front/rear/right/left balance (30-60mm) without affecting the spring rate. The ride height can be increased by 60mm (2.5 inches). Although the ride quality is good enough for city driving, it is designed for off-road and competition use. *Front height up for JB33 and JB43 is 10~15mm lower.

Coil Spring	FL	FR	RL	RR
Spring Rate (kg/mm)	2.20	2.20	1.97	2.02
Free Length (mm)	376	396	357	387

Bilstein Shock

For JB23/33/43

S00100
¥140,000

Based on PADOKKU Bilstein shocks, set for JB23/33/43. 50~60mm up.

SG Adjustable Coil 60 Bilstein Shock Set

For JB23/33/43 Set includes SG Adjust Coil 60, Long Brake Hose, Caster Dream, Lateral Rod★1, Bilstein Shocks *Contents may vary depending on the set.

This suspension set was designed with competition in mind and has achieved numerous results at JSTC events around the world. It can be used for all purposes from street driving to competition. The weak overcoil characteristic allows the car to turn by throttle control instead of steering angle by stepping on the accelerator pedal aggressively. By cutting the wire-to-wire contact area at the top of the coil, it is possible to adjust the ride height and the front/rear/right/left balance. The amount of ride height increase is 60mm(2.5 inches). *The amount of front height increase for JB33 and JB43 is about 10~15mm lower.

SG Adjustable Coil 60 Bilstein Shock Set S00210

Standard Set ¥235,000

SG Adjustable Coil 60 Bilstein Shock B Set S00211

Standard Set + High Capacity Bump Rubber★2 ¥242,000

SG Adjustable Coil 60 Bilstein Shock BA Set S00212

Standard Set + High Capacity Bump Rubber★2 Front/Rear Reinforced Arm★3 ¥325,000

SG Adjustable Coil 60 AS8 Shock Set

For JB23/33/43 Set includes SG Adjustable Coil 60, Long Brake Hose, Caster Dream, Lateral Rod★1, AS8 Shock *Contents may vary depending on the set.

This set combines SG Adjustable Coil 60 and AS8 shock with damping force adjustment. Recommended mainly for city driving. By cutting the wire-to-wire contact area at the top of the coil, the ride height and front/rear/right/left balance can be adjusted. The ride height can be increased by 60mm (2.5 inches). *The amount of front height increase for JB33 and JB43 is about 10~15mm lower.

SG Adjustable Coil 60 AS8 Shock Set S00200

Standard Set ¥158,000

SG Adjust Coil 60 AS8 Shock B Set S00201

Standard Set + High Capacity Bump Rubber★2 ¥169,000

SG Adjust Coil 60 AS8 Shock BA Set S00202

Standard Set + High Capacity Bump Rubber★2 Front/Rear Reinforced Arm★3 ¥255,000

- ★1: Front and rear lateral rods can be selected from red, black, blue, gunmetal, and stainless steel.
- ★2: Bump rubber hardness can be selected from hard, soft, and super soft. We recommend soft front and super soft rear.
- ★3: The color of reinforced arm can be selected from Gunmetal, Red, Black.

The Photo shows standard set.

The ride quality can be freely adjusted to suit your riding style and situation.

The Photo shows standard set.

Adjustable Lateral Rod

For JB23/33/43

Parts to correct suspension that causes lateral misalignment due to ride height change. By optimizing the geometry, it reduces body wobble, etc.

Adjustable Lateral Rod Stainless Steel

S00052 For front ¥22,500

S00053 For rear ¥22,500

Made of stainless steel, rust-resistant and strong. Rubber bushings are used for the rod ends. *Rod ends are consumable parts and need to be replaced periodically.

Adjustable Lateral Rod Genuine processed products

For front ¥28,000 each

For rear ¥21,000 each

Superior durability due to stock rod processing. The rod ends are rubber bushings. Available in red, black, gunmetal, and blue.

Red	S00720 For front	S00730 For Rear
Black	S00721 For front	S00731 For Rear
Gunmetal	S00722 For front	S00732 For Rear
Blue	S00723 For Front	S00733 For Rear

Rear Lateral Rod Correction Bracket

For JB23/33 S00799 ¥7,000

Bracket to correct the rear housings' lateral rod mounting position upward by approximately 50mm when raising the vehicle height. It reduces scuffing change and improves driving stability.

Adjustable Lateral Rod Stainless Steel Rod End

For JB23/33/43

S00060 For front/rear ¥16,000

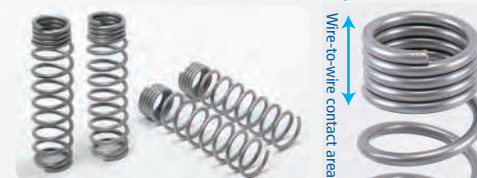

Replace rubber ends that have deteriorated over time, cracked, or broken. By refreshing the rubber ends, lost handling and ride comfort will be restored.

For those who mainly drive in town and off-road...

SG Adjustable Coil 75

For JB23/33/43 S00041 ¥35,000 per car

The SG Adjustable Coil 75 is designed for city to off-road driving, and although it depends on the characteristics of the combined absorber, it does not have an uncomfortable thrust, but absorbs it softly while suppressing roll. The spring rate is maintained by cutting the coil upper part where the wires are closely connected, and the ride height can be adjusted between 45 and 75 mm. Front/rear/right/left balance adjustment is also possible. The vehicle height can be increased by 75mm (with spare tire and rear seat).

*Front height up amount is 10~15mm lower for JB33 and JB43.

Coil Spring	FL	FR	RL	RR
Spring Rate (kg/mm)	2.18	2.18	2.20	2.20
Free Length (mm)	387	410	372	397

SG Adjustable Coil 75 Solve Shock Set

For JB23/33/43 Set includes SG Adjust coil 75, long brake hose, caster dream, lateral rod★1, solv-shock, rear lateral rod correction bracket *Contents may vary depending on the set.

Intended for street and off-road driving. Uncomfortable thrust is softly absorbed while roll is minimized. Ride height is increased by 75mm (3 inches) with spare tire and rear seat.

*Front ride height is 10~15mm lower for JB33 and JB43.

SG Adjustable Coil 75 Solv Shock Set S00230

Standard Set ¥146,000

SG Adjustable Coil 75 Solv Shock B Set S00231

Standard Set + High Capacity Bump Rubber★2 ¥157,000

SG Adjustable Coil 75 Solv Shock BA Set S00232

Standard Set + High Capacity Bump Rubber★2 Front/Rear Reinforced Arm★3 ¥250,000

The Photo shows standard set.

Comfortable city driving

SG Adjustable Coil 75 AS8 Shock Set

For JB23/33/43 Set includes SG Adjust coil 75, long brake hose, caster dream, lateral rod★1, AS8-shock, rear lateral rod correction bracket *Contents may vary depending on the set.

This set is recommended for both city driving and off-road driving. 8-step adjustable shock absorbers allow you to adjust the ride quality to your preference. The ride height can be increased by 75mm (3 inches) for vehicles with a spare tire and rear seat.

*Front ride height is 10~15mm lower for JB33 and JB43.

SG Adjustable Coil 75 AS8 Shock Set S00220

Standard Set ¥165,000

SG Adjustable Coil 75 AS8 Shock B Set S00221

Standard Set + High Capacity Bump Rubber★2 ¥176,000

SG Adjustable Coil 75 AS8 Shock BA Set S00222

Standard Set + High Capacity Bump Rubber★2 Front/Rear Reinforced Arm★3 ¥263,000

- ★1: Front and rear lateral rods can be selected from red, black, blue, gunmetal, and stainless steel.
- ★2: Bump rubber hardness can be selected from hard, soft, and super soft. We recommend soft front and super soft rear.
- ★3: The color of reinforced arm can be selected from Gunmetal, Red, Black.

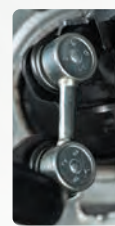

The Photo shows standard set.

Ride quality can be freely adjusted according to riding style and situations.

Short Sway Bar Link

For JB64/74 S00110 ¥4,700 right and left set

These sway bar links are 30mm shorter than the genuine parts. This is a set of left and right links for one vehicle. They correct the angle of the links on a lifted vehicle, allowing the sway bar to work more efficiently and reducing roll. In addition, the shorter length increases the clearance between the ground and the vehicle, making it less likely to hit obstacles. Compatible with 20mm to 3-inch lifts. The degree of lift-up will require the correction of the angle of the sway bar. No correction is required for 20-40mm lift-up. For 2-inch lift-up, use a 5-15mm sway bar down spacer. For 3-inch lift-up, use a 20-30mm sway bar down spacer in combination.

Sway Bar Down Spacer 25mm

For JB23/33/43

By lowering the installation position, it corrects the angle of the sway bar links on a lifted vehicle and makes the sway bar work more efficiently. Material: Aluminum. Black in color.

Shock Absorber Upper Bush With Sleeves

For JB23/33/43

¥1,400 each / set of 4

S00158 Normal S00159 Sports

Bush for the upper part of the front shock absorber. Two types are available: Sport (direct feel) and Normal (equivalent to stock). The normal type can be used as a substitute for the genuine part.

Quick Body Mount

For JB64/74

S00031 ¥6,000 per car

The shape of the stock bushings has been reviewed to increase rigidity. Reduced yawing between the body and the frame, reduced body wobble and roll, improved turning performance, and more straightforward transmission of suspension movement. This set includes only 8 replacement parts, which can be done in a short time without the need to detach the frame. You can experience the effect of replacing only half of the 16 parts. There is no increase in unpleasant vibration or noise due to the replacement. There is no change in vehicle height. Useful not only for vehicles with deteriorated mounts, but also for replacement when the vehicle is new. Also effective for body lifted vehicles.

Reinforced Body Mount

For JB23/33/43 S00030 ¥11,000 per car

The body and frame need to be separated, but we recommend the full set of reinforced body mounts for those who want more effectiveness.

JB23/33/43 OTHERS

SUSPENSION

Suspension Parts for JB23/33/43

High Capacity Bump Rubber

For JB23/33/43

Front **¥8,400** each/set of 2

S00068 Hard (hardness 70)

S00069 Soft (hardness 60)

S00070 Super Soft (hardness 50)

Rear **¥6,600** each/set of 2

S00071 Hard (hardness 70)

S00072 Soft (hardness 60)

S00073 Super Soft (hardness 50)

Bump rubber with significantly increased capacity compared to stock. Overall length is 125mm, about 65mm longer than stock. Can be easily cut with a cutter knife and adjusted to suit the application. Bolt-on installation. The front bump rubber is about 80mm longer than stock with the included 15mm spacer. If you cut off the plate where the stock bump rubber fits, you can install without using the spacer, and you can install without sacrificing (cutting) the bump rubber capacity for the clearance (15mm) that is created. Choose the hard type (hardness 70) for use in bumping regulations, or the soft type (hardness 60) for shock absorption in speed competitions. Super soft type (hardness 50) is excellent in shock absorption and can be used for both front and rear bumps in speed competitions, but is especially recommended for rear bumps. For reference, the factory bump rubbers are all hardness 70.

Necessity of bump rubber with larger capacity

First of all, it greatly increases shock absorption. Also, by extending the overall length, bump rubbers can be used more aggressively to prevent contact between the tires and the body, and to reduce body sway. In addition, it can be regarded as a "second spring" with a higher spring rate, and can provide a sense of stability when cornering on-road as well as off-road.

Rear Bump Block Exclusively for high-capacity bump rubber

For JB23/33/43

S00028

¥6,000 right/left set

Aluminum block and bolt set for installing high capacity bump rubbers inside the rear coil springs. The spring acts as a support and will firmly hit the hosing in any situation. Bolt-on installation, enabling W-bump specification. *A separate high-capacity bump rubber is required.

Rear Bump Extension Block for high-capacity bump rubber

For JB23/33/43

S00037 Full set

¥7,000 right/left set

S00038 50mm

¥4,800 right/left set

S00039 25mm

¥2,800 right/left set

This is a set of extension blocks and bolts for shortening the rear high-capacity bump rubber. By shortening the bump rubber, it reduces swaying and bending for a more stable touch. 25mm and 50mm can be used as a set for 3-step adjustment up to a maximum of 75mm.

Coil Spacer

For JB23/33/43

S00063 10mm **¥4,900** piece

S00064 15mm **S00065** 20mm

¥5,200 each /piece

Aluminum coil spacers for ride height adjustment (front/rear balance, etc.)

Coil Spacer 5mm

For JB23/33/43

¥2,500 each / set of 2

S00066 For front

S00067 For Rear

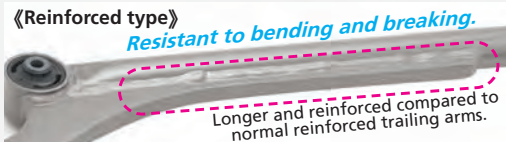

5mm coil spacers for ride height adjustment. Can be used as 10mm spacers by overlapping. Includes a turn stopper.

Reinforced Arm

For JB23/33/43

Made of STKM13A and 5mm thick, these arms are much stronger than the genuine arms, which tend to bend and break easily. Wheelbase, caster angle, hosing angle, etc. have been corrected. Corrects suspension misalignment caused by inch-up and secures the original performance of suspension. Bushings are already press-fitted. Available in gunmetal, red and black.

Reinforced Leading Arm

For front **¥55,000** each /right and left set

For front. Extends +6mm (for 2") and +10mm (for 3") to compensate for wheelbase. It prevents interference between the tires and fenders. Caster angle has also been corrected to 5.2° (for 2-inch) and 7.9° (for 3-inch).

Gunmetal **S00022** 2 inch
S00024 3 inch

Red **S00090** 2 inch
S00091 3 inch

Black **S00101** 2 inch
S00102 3 inch

Reinforced Trailing Arms

For rear **¥51,000** each /right and left set

For rear. The hosing part is 22mm thick and shaped to secure load clearance. The hosing angle has been corrected (2.1°) for lift-up.

S00026
Gunmetal

S00092
Red

S00103
Black

Reinforced Trailing Arm (Angle Correction Reinforced Type)

For rear **¥68,000** each /right and left set

For rear. Compared to the conventional reinforced arms, the ribbed part has been extended to increase durability against bending. Recommended for off-road driving.

S00121
Gunmetal

S00122
Red

S00123
Black

High Capacity Figure-8 Bump Rubber

For SJ30 JA11/12/22 JB31/32 front

¥3,300 each/piece

S00015 Hard (hardness 70)

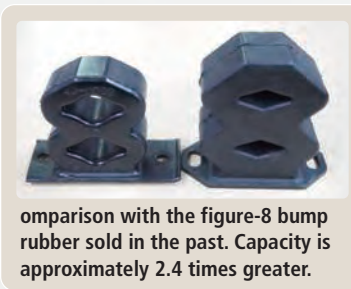

S00016 Soft (hardness 60)

S00017 Super soft (hardness 50)

Compared to conventional figure-8 bump rubbers, the hollow portion has been reduced to 1.5 times (50mm) thicker, 1.25 times (100mm) taller, 84mm wider, and 2.4 times larger in capacity. The rigidity of the product itself is increased, so it is less likely to warp or sag, and it hits the hosing more firmly. The mounting portion has been machined with long holes, allowing adjustment of the contact position. Please choose the hard type for those who want a firm fit, and the soft or super soft type for those who want shock absorption.

《Optional brackets are required for JB23, JB33, and JB43》

omparison with the figure-8 bump rubber sold in the past. Capacity is approximately 2.4 times greater.

Front Shock Guard

For JB23-2 type or later/JB43

¥11,500 each

S00504 Gunmetal

S00505 Red **S00506** Black

Securely guards the bracket on the underside of the front shock. Protects from impact and improves running performance. Steel 4.5mm thick. Red paint. Installation requires enlarging the hole.

OTHERS

Other parts for JB23/33/43

Propeller Shaft Spacer 10mm

For JB23/33/43

S00019

¥7,600

Prevents the constant velocity joint part of the rear propeller shaft from coming off at full rebound. Depending on the absorber used, this item is necessary when driving off-road with a ride height increase of 3 inches or more.

Manual Hub Installation Kit

For JB23/33/43

D00030 For JA22 freehub **¥7,000** unit

D00031 For JA11 free hub **¥11,400** unit

This kit converts the air locking hub adopted from JB23 to the manual hub equipped on JA11 and other vehicles. Since air locking hubs can malfunction due to mechanical problems such as negative pressure leakage and it is difficult to visually check the locking status, we recommend the conversion to a manual hub that is highly reliable and operates reliably when the need arises. *Specifically, a genuine Suzuki freehub for JA11 or JA22 and a cone washer to install the freehub are required.

Hub Nut Without Brim

For JB23/33/43

D00032 **¥3,000** piece

Repair parts for the manual hub installation kit. Sold as a single unit. Cannot be used on vehicles with genuine air locking hubs. Instruction manual is not included as this is a repair part.

Freehub Bolt Set

For JB23/33/43

D00025 **¥3,200** unit

《Compatible with all Jimmy models》

Set of high strength bolts, spring washers, and cone washers for fixing the freehub. The bolts are stronger than the genuine ones, and by increasing the tightening torque, the free hub is firmly secured to prevent damage to the bolts.

Free Hub Cover Gasket

General purpose

D00016 **¥180** piece

Suzuki part number 43813-60A00. this gasket is used for the front suspension free hub. One gasket is used on each side and two gaskets are used for one car.

Free Hub Packing

General purpose

D00015 **¥160** Sheet

Suzuki part number 43842-80001. these gaskets are used for the free hub of the front undercarriage. One packing is used for one side, and two are used for one car.

Free Hub O-ring

General purpose

D00014 **¥290** piece

Suzuki part number 43838-60A00. o-rings are used in the free hub of the front undercarriage. One O-ring is used on each side and two are used for one car.

Base Sheet for Hook IN103

- E20032 For 4 carriers ¥800 4 sheets
- E20034 For 6 carriers ¥1,200 6 sheets

Protective sheets to prevent scratches on the roof caused by mounting on carriers. Can be applied to curved surfaces without fail and can be removed cleanly without leaving adhesive residue. The special transparent sheet is not noticeable.

UNIFAS iGuard Anti-theft Bolt/nut General purpose

- E20033 For roof rack with foot ¥2,400 set of 2
- E20037 For Roof Rack Standard ¥4,500 set of 2

Innovative screw kit with a high degree of security. The use of stainless steel makes it resistant to rust and protects the car in a visually pleasing manner.

A-x emblem 14cm 000161 ¥1,800 (税込) General purpose

Full version of the A-x logo emblem, including the Yamagata design. Aluminum-like hairline finish with a textured silver color that changes expression depending on the angle of view. The three-dimensional design adds a point of interest to the exterior. Adhesion is made with highly durable double-sided tape. Approximately 140mm×30mm×2mm

A-x emblem mountain 14cm 000162 ¥1,600 (税込) General purpose

Full version of the A-x logo emblem, including the mountain design. Aluminum-like hairline finish with a textured silver color that changes expression depending on the angle of view. The three-dimensional design adds a point of interest to the exterior. Adhesion is made with highly durable double-sided tape. Approximately 140mm×30mm×2mm

CAMP GEAR

Camping Gear

A-x Series A-x Awning

General purpose E20120 2000×2500mm ¥33,000

The A-x awning is easy to set up and clean up. It works well with the roof rack, and after storing it, it can be compactly stored on the side of the rack without reducing the load capacity. The canvas is made of 420D oxford and has a water pressure resistance of 3000mm. The telescopic aluminum poles are easily height-adjustable and can be used flexibly according to weather and sunlight. The soft case is also made of a durable material. Can be attached to other manufacturers' roof racks if the size fits. Pegs and guy ropes included. 2.0m(W)×2.5m(L), approx. 8kg

A-x Roof Rack with Foot Type Exclusive Awning Mounting Stays

General purpose E20110 Set of 2 ¥7,700 E20111 Set of 3 ¥9,000

Made of stainless steel, with bolts for attaching to the rack. Compatible with various awning manufacturers. Mounting pitch 40-50mm, M6, M8, ARB and BLAST TRAIL have already confirmed. Awning mounting screws are not included.

A-x Roof Rack Standard Type Awning Mounting Stays

General purpose E20112 Set of 2 ¥11,600 E20113 Set of 3 ¥17,400

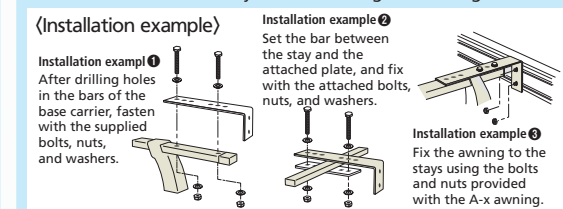

Stainless steel stays for attaching an awning to the A-x Roof Rack Standard Type. Completely bolt-on, no modification required. Includes all necessary bolts for attaching to the roof rack. All bolts are made of rust-resistant stainless steel. The mounting pitch is 35-65mm, and the bolts are M6 or M8. Compatible with awning products from various awning manufacturers; products from ARB and Blast Trail have been tested for compatibility. *Bolts and nuts for attaching awnings are not included.

General-purpose for Awning Mounting Stays

General purpose E20109 ¥1,500

Stay for attaching A-x awning to general-purpose basecarriers. Please use your own ingenuity to mount the awning by pinching it or drilling a hole to fix it in place. May not be used depending on the car model, base carrier, etc. *Bolts and nuts for attaching the awning are not included. We do not provide advice on how to install the awning. Please install the awning after careful consideration of its strength and other factors in accordance with the environment in which you will be using the awning.

Aluminum Outdoor Chair

General purpose ¥3,900 each 001005 Blue 001006 Orange

Lightweight and compact. The seat is made of durable oxford. The seat is partially constructed of mesh to ensure ventilation.

- Size (approx.): 105×59×70cm
- Seat height: 46cm
- Storage size (approx.): 43×15×15cm
- Weight (approx.): 1.2kg
- Load capacity (approx.): 150kg
- Accessories: main unit / storage bag
- Materials: 7075 aluminum alloy / high-quality plastic holder / Oxford (900D)

Wood Outdoor Chair

General purpose 001001 ¥6,500

The natural texture of canvas and wood harmonizes with your favorite outdoor space. The seat can be easily removed for washing.

- Size (approx.): 90×52×70cm
- Seat height: 45cm
- Storage size (approx.): 110×17×15cm
- Weight (approx.): 4.2kg
- Load capacity (approx.): 120kg
- Materials: Canvas / Wood
- Accessories: Main unit / Storage bag

Cargo Net

General purpose Wire diameter: approx. 8 mm, grid size: approx. 9×9 cm, hooks are movable, allowing adjustment of the cargo hanging angle. Made of resin with excellent strength and relatively low aggressiveness to objects. Moderate elasticity of approximately 150% for both ease of use and fixing force.

E20045 S size (90cm×90cm) ¥2,700

*Compatible with A-x Roof Rack S size and M size

E20046 M size (100cm×100cm) ¥3,000

*Compatible with A-x Roof Rack M Size Wide, M Size Super Wide, L Size, and L Size Wide

E20047 L size (120cm×100cm) ¥3,300

*Available for A-x Roof Rack L size, L size wide, L super wide, and LL size.

*Compatible roof rack sizes are approximate.

The size of the corresponding net varies greatly depending on the actual roof rack used and the shape and quantity of the cargo. Please select the size of the product after considering the elongation rate of the product.

Size (cm)	Maximum dimensions (cm)	Elongation rate (%)
Size S (90×90)	150×150	166
Size M (100×100)	160×160	160
Size L (120×100)	180×160	150×160

*The elongation rate is measured by hand, so there is a margin of error.

LAMP

Lamps

All of Lightning's LED lights are compliant with safety standards and have been designed to prevent high-flash.

Jimny LED Tail Lamp For JB64/74 ¥31,000 each /right/left set

All LED original tail lamps. Can be installed on the factory bumper or outside bumper. Blinks (16 LEDs per side) are sequential lighting toward outside (switchable to normal lighting). LED bar type (34 LEDs per side) for the small lights, 25 LEDs per side for the brake lamps, and 6 LEDs per side for the back-up lamps. Includes a resistor to prevent high-flash, ABS lamps, and ESP lamps from lighting up incorrectly.

Jimny LED Tail Lamp For JB23/33/43

Jimny LED Fog Light Inner Black For JB23/33/43/64/74

The inner lenses are black for a calm appearance, 5W x 3 LEDs, IP68 waterproof and dustproof design. Aluminum housing with heat sink, polycarbonate lens and body material, with optical axis adjustment function. Two colors are available: white for high visibility and fashionable, and yellow for easy visibility in bad weather conditions such as rain, fog, and snow.

E00014 White
E00015 Yellow

Jimny LED Backup Lamp For JB23/33/43 ¥6,000 each /right/left set

8 projector type LEDs (5700k) are used per side. They are much brighter than the genuine ones and ensure safe visibility when backing up, such as when parking.

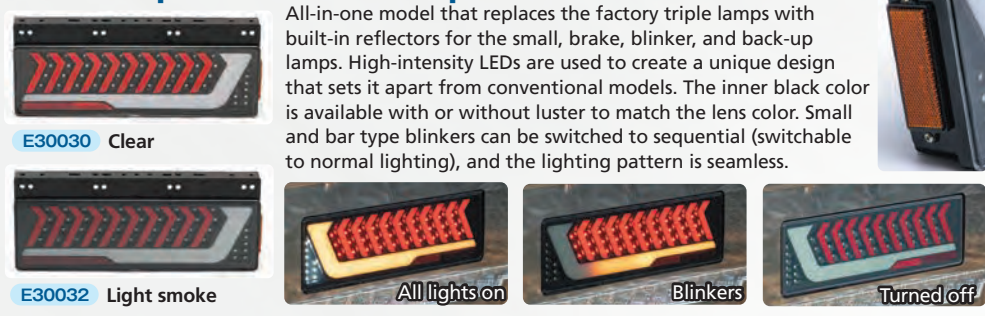

Truck Double LED Tail Lamp For Truck ¥53,500 each /right/left set

All-in-one model that replaces the factory two-lens with a sporty and stylish look with built-in small, brake, blinker, and back-up lamps and reflectors. Inner black is available with or without luster to match the lens color. Blinks are sequential lighting. High brightness LEDs are used for improved visibility and safety.

Truck Triple LED Tail Lamp For Truck ¥62,500 right/left set

N-VAN LED Tail Lamp For JJ1/JJ2

¥45,000 right/left set

The contrast between the bold bar-type LEDs and the all-black body of the N-VAN makes the Honda N-VAN even more attractive. The mechanical design of the inner parts goes well with the flat and boxy silhouette. All-in-one model with brake, blinker, back, small, and reflector built in. Includes a resistor to prevent high-flash. Sequential lighting is also available.

PROBOX LED Tail Lamp For 50/160 series ¥45,000 right/left set

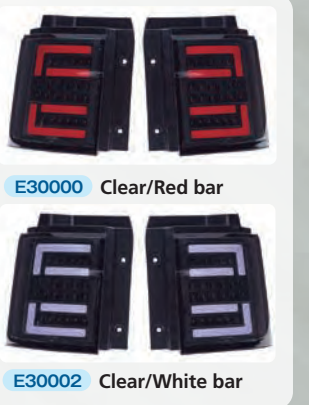

Showa Garage's fully original model exclusively designed for PROBOX, which adds a playful touch to business cars. Clear lens model with vivid contrast between red bar and inner black. Built-in brake, blinker, reverse, small, and reflector. Equipped with high-flash prevention resistor. Sequential lighting is also available.

DELICA D:5 LED Tail Lamp For early model ¥33,000 right/left set

Original all-LED tail lamps with a contrast between the rear garnish and inner black to give the unique tail area an impression. The square design of 4 bar type LEDs placed on one side matches the body shape of DELICA perfectly. Two rows of 6 indicator LEDs on each side turn outward sequentially (switchable to normal lighting). LED bar type for the smokers and 2 rows of 6 LEDs per side for the brake lamps. Resistors are included to prevent high-flash, ABS lamps, and ASC lamps from lighting up incorrectly.

*Light Smoke lens color is a lighter shade of smoke. The inner panel is gloss black, which gives it a tighter black tint and a smoke-like appearance.
In bright locations such as daytime, there is not much difference in appearance from clear, but in the evening or in dark locations, it has a darker appearance.
*A separate resistor may be required depending on the car model and installation method.
*Depending on the installation method, the product may not be compliant with safety standards. Please check in advance before purchase.

HIJET Truck LED Tail Lamp / LED Backup Lamp

LED tail lamps with variations on the inner body and a lineup of different styles: matte black for clear and gloss black for light smoke. The bar-type blinker that doubles as a small light emits a bright orange light when lit. Smooth sequential lighting and normal lighting can be switched depending on the connection method when wiring. The brake lamps are brightly illuminated by 12 LED bulbs in the center and are equipped with a resistor to prevent high-flash. 9 LED back-up lamps use high brightness LEDs and are much brighter than the genuine lamps, making it easier to drive backwards. The combination of tail lamps and backup lamps creates a more stylish rear area.

CARRY LED Tail Lamp / LED Backup Lamp For DA16/63/65

The inner body of the LED tail lamp is available with or without luster to match the lens color. The blinker part, which also serves as a small light, has a three-dimensional structure, creating a style beyond its class both when the light is on and when the light is off. The brake has 9 LED bulbs in the center. The blinkers can be switched between sequential and normal lighting depending on the connection method used when wiring. Easy installation with just a coupler-on connection. LED back lamps using 12 bulbs of high brightness LEDs are much brighter than the genuine lamps and can be used when backing up. Combination of tail lamps and backup lamps creates a more stylish rear area.

*Wiring modification and a separate reflector are required when installing on DA63/65.

SUSPENSION Suspension for HIACE and CARAVAN

High Capacity Soft Bump Rubber

S20001 For 200 series HIACE ¥8,900 each /right/left set

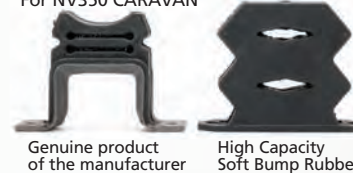

S20003 For NV350 CARAVAN

Soft and much large capacity compared to the genuine product.

Greatly reduces the impact of bump touches that occur when the suspension contracts on rough roads with severe bumps, road surface undulations, and bumps. By reducing the hardness and increasing the capacity of the bump rubber, the shock is firmly absorbed and the ride is surprisingly comfortable. Recommended for heavy loads and cargo, such as interior campers, welfare vehicles, lowered vehicles, transporters for motorcycles and marine sports, delivery vehicles, and more.

For NV350 CARAVAN

Genuine product of the manufacturer High Capacity Soft Bump Rubber

For low-down customization, camper, welfare vehicles, more comfort, more luxury.

Easy installation with bolt-on design to replace the factory unit. Sold as a left/right rear set.

Adjustable! Easy to cut with a cutter knife!

Cutting and adjustment can be made for installation when the gap between the frame and the hosing is small due to the amount of mounting or lowering.

*The more it is cut, the less capacity it has to absorb shocks.

Testimonials from installers

▶ I had a tool sale van loaded with a large amount of tools. The tools used to fly all over the place where there were steps such as railroad crossings, but after installing this product, I don't have to worry about driving anymore.

▶ The vehicle, which is 3 inches down

Very soft and supple. Even on a road where the rear end always feels like it is going out of control, it is now able to pass through as smoothly as a car with a spring.

〔Caution〕 Please inspect regularly for possible cracking, shredding, etc. due to age-related deterioration. The effect may not be felt at normal ride height with no loading.

Soft and approximately 2.5 times higher capacity than genuine!

《Installation example according to each vehicle height》

Normal ride height Vehicle with 2 inches down or with heavy load Vehicle down 3 inches

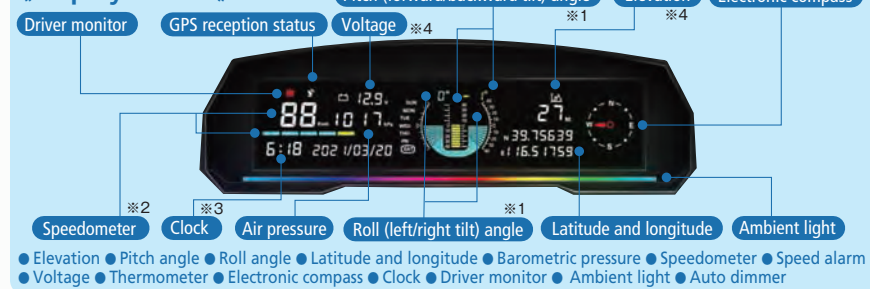

No need to worry about errors even with large-diameter tires!
GPS speedometer you can use!

Digital Clinometer Type 2

General purpose For 12V and 24V cars 000017 ¥16,300

Multifunctional digital clinometer that displays roll (right/left tilt) angle, pitch (front/rear tilt) angle, interior temperature, clock, voltage, speed, azimuth (8 directions), elevation, etc. on the display. This provides peace of mind in knowing more about the condition of the vehicle and the conditions in which it is placed. Above all, the driver's seat, surrounded by instruments, creates a personal cockpit atmosphere and enhances the driver's mood. Various information is provided through displays and sounds. GPS speedometer function that is not affected by the tire diameter. Selectable display of kilometer or mileage. Installation is as simple as installing the main unit, various antennas and sensors, and plugging the cigar plug into the socket. Instruction manual included. Dimensions: 19.0cm(W)×10cm(D)×6cm(H) 1-year warranty

Display Details

1: Graphic (scale) and numerical displays are provided. 2: Numerical values and bar graphs are displayed.
3: Date, time, and day of the week are displayed. 4: Indoor thermometer and voltage are automatically switched.
*FM radio reception may be difficult.

Face Towel General purpose 000201 ¥1,100

This face towel features the same design as the side decals of the Showa Garage complete car. Dyed and woven in Imabari, Shikoku, one of the three major towel production areas in Japan. It can be used not only for outdoor activities, but also in the kitchen, bath, as a scarf or bandana, or as a cover for pillows and cushions, etc. It is a versatile size that can be used for any purpose.
*Please note that the color may fade or migrate in the early stages of use, so please wash separately from other items. Do not use chlorine bleach.

Muffler Towel General purpose 000200 ¥1,700

This muffler towel features the same design as the side decals of the Showa Garage complete car. It is dyed and woven in Imabari, Shikoku, one of the three major towel production areas in Japan, and has a perfect texture to the touch. The towel can be literally wrapped around the neck or used as a face towel. The small size is ideal for events and leisure activities.
*Please note that the color may fade or migrate in the early stages of use, so please wash separately from other items. Do not use chlorine bleach.

Showa GARAGE is also actively involved in motor sports. We are proud of our participation in numerous competitions such as RALLY HOKKAIDO and Off-Road Challenge Speed and Tactical Dirt Attack, and of the many prizes we have won. The solid knowledge and skills cultivated through these races are steadily fed back into the development of our original parts, which we deliver to our customers on a daily basis. In addition, we travel all over the country to promote the appeal of Jimny through various motor shows, events, and racing activities. We also organize many events for beginners to enjoy, such as off-road trial experience at our company-sponsored events.
